UN environment | Fujimori would offer aircraft to guerrillas but would pay no ransom | Sterling agency reforms hit opposition

Spain, Britain and the US are withholding their 1997 contributions to the United Nations Environment Programme after some developing countries subverted attempts to reform the trou-hled environment agency, western officials say. Environment ministers had been expected to approve the long-delayed reforms in Nairobi last week, but the meeting ended in acrimony after India, Bangladesh, and Colombia led last minute opposition to the plans. Page 12

Russia raises Nato stakes: Russian security chief Ivan Rybkin said Moscow should be ready to unleash nuclear missiles in response to any attack hy conventional forces. His policy proposal is Russia's latest bostile reaction to Nato'a planned eastward expansion. Page 12

Timmer quits Philips: Jan Timmer, who led Philips from near bankruptcy five years ago, quit as a non-executive director of the Dutch electronics group less than four months after handing over to new president Cor Boonstra. The company would not elaborate on Mr Timmer's "personal" reasons for going. Page 13

General Electric of the US has quit negotiations to build engines for a 375-seat aircraft planned hy Airhus Industrie, the European manufacturing consortium, because of differences over the sharing of development costs.

Fannie Mae, the US Federal National Mortgage Association, launched the first ster-ling-denominated global bond, reflecting the pound's growing strength against other European currencies, Page 13 ; Currencies, Page 23

More Albanian protests: At least 30,000 angry mourners poured through the Albanian port of Vlore behind the coffin of an anti-government demonstrator killed in clashes with police. Later more than 10,000 people gathered to protest against the government's handling of failed investment schemes.

Reuters cautious: Reuters shares fell 16p to 626p after the financial information and media group issne a cautious outlook on trading. Pretax profits rose 17 per cent in 1996 to £701m (\$1.1bn). Page 13; Lex. Page 12; London stocks,

Ericsson profits jump: The Swedish telecom group shrugged off price competition in its flagship mohile phones division to report a 39 per cent jump in fourth-quarter pre-tax profits to SKr3.9bn . Page 13

Peru ready for deal to free Lima hostages

and Sally Bowen in Lima

President Alberto Fujimori of Peru said yesterday he was ready to put an aircraft at the disposal of the guerrilla group holding 72 hostages at the Japanese amhassador's residence in Lima - hut that he would

pay no ransom. Preliminary talks with members of the Tupac Amaru Revolutionary Movement (MRTA) were due to start yesterday in Lima amid tight security.

Speaking in London, where he was attending a Latin Amsrican trade and investment conference, Mr Fujimori said the final objective was to find a formula to allow the hostage-takers to save face. He reiterated his position that the guerrillas' main

demand - the release of colleagues jailed in Peru - was not negotiable.

Mr Fujimori agreed tbere were similarities between the Lima incident and the assault in 1980 hy guerrillas from the Colombian group, M-19, on the emhassy of the Dominican Republic in Bogotá. "Both groups were after money," he

Cariplo, Italy's largest savings

Cariplo makes formal approach to Ambroveneto Mr Giussppe Guzzetti, the insurance companies. Cariplo wants to be privatised this new chairman of the charita- has made clear it is reviewing year. Mr Guzzetti, a former

hank, has made a formal approach to Banco Ambrosiano Veneto, a large private-sector bank also based in the rich industrial north, about forging a strategic alliance. The proposal, if successful,

could lead to a merger which would create one of the country's largest hanking groups with total deposits of 1.250,000hn (\$153.5bn). Cariplo's approach

Ambroveneto is part of an series of intense behind-thescenes manoeuvres in the Italian banking system, driven hy an urgent need to restructure. modernise, consolidate and privatise in the face of growing international competition.

hle foundation which controls Cariplo, said last week that the bank needed an alliance with another strong north Italian banking group, as well as a link with foreign institutions.

Ambroveneto, in which the French group Crédit Agricole owns a 29 per cent stake, is widely seen as Cariplo's preferred partner, although Banca Commerciale Italiana is also considered a possibility.

The recent Banco di Napoli takeover by Banca Nazionale del Lavoro and the INA insurance group has also changed hasis of existing ties hetween Italian hanks and

its stakes in both INA and the IMI medium-term bank in the light of the changes in the shareholding structures of italian banking institutions.

The Milan-hased savings wanted to strengthen its presence in the north after the losses it has incurred in southern Italy. The restructuring and write-downs of its southern operations are expected to lead to a sharp fall in Cariplo's net profits for 1996. These are expected to amount

to barely L8bn, compared with L341bn in 1995. Although tha savings bank

Christian Democrat president of the Lombardy region, said he favoured privatisation initially through a strategic alliance rather than a stock market flotation. A first attempt to bank also emphasised it float Cariplo was abandoned in 1994 because of poor market

conditions. Cariplo's approach to privatisation reflects the current

equity makes them unattractive sell-off candidates. The banks are also reluctant to abandon old ways of doing

business and are therefore seeking alliances with friendly partners before considering going to the open market. Most bankers now expect the pace of privatisation to speed up after languishing for the

Setback for

Slovak PM

The Slovak government of Prime Minister Vladimir

Meciar suffered a rare and potentially destabilising

setback yesterday when parliament failed to pass a law

that critics said would have imposed severe restrictions

on freedom of speech and opposition political activities.

The law was a watered-down version of an earlier

measure on "protection of the republic" that President

Michal Kovac refused to sign into law and returned for

amendment. The measure garnered 69 votes, but 72 votes

Three MPs who abstained are members of the Workers

party, a junior partner in Mr Meciar'a nationalist-populist

coalition. The move, reflected growing tensions within the coalition over economic and privatisation policy rather

than ideological objections. The measure, a brainchild of

mittee rejected an amend-

anti-government demonstra-

victories

in Crédit Local's annual analysis, Mr Richard said local authorities French local authorities plan to would add just FFr10hn (\$1.8bn) to their debt levels; they could, however, borrow up to an additional FFr25hn without jeopardising France's ability to meet the Maastricht criterion for monetary union whereby the government's budget deficit must be no more than 3 per cent of gross domestic product.

Aggregate operating receipts by local authorities will rise 3 per cent to FFr647hn this year, while resources from investment including state grants and borrowings will remain almost unchanged from last year at FFr112bn.

per cent to FFr444bn, while reimbursemeots of existing deht will increase 9 per cent to FFr63bn and debt servicing charges will fall by nearly 8 per cent to FFr51bn.

The figures cover the budgets of France's 60,000 communes, departments, regions and other political institutions and related organisations, which have played a growing role in the national economy over the past few years after reforms designed to decentralise power from Paris.

Mr Richard warned that local authorities were "committing a strategic error" hy turning to

seeking outside finance for investment projects.

year will rise hy 7 per cent, above the pace of growth of the economy for the seventh year running. Mr increased frustration from companies and households.

He said that the brake on investment was largely the result of political, administrative and "aven psychological" factors rather than any financial handicap, notahly given tha reduction in the past few months of interest rates.

He argued that economic growth

Management costs will rise by 4 increased taxation rather than would be around 2 per cent over

 Mr Louis Gallois, head of the Overall, local taxes during the French state-owned SNCF rail company, said yesterday he expected the organisation to make a 1997 loss of FFr2hn, rather than Richard said this risked triggering FFr15bn as expected before the government's rail reforms were cleared hy parliament, writes David Owen in Paris.

Under the reforms, the government is to take over FFr134bn of the company's debts and future responsibility for rail infrastructure. Mr Gallois compared tha transfer to a lead weight that had

has been heavily criticised by civil rights groups, church leaders and western governments. Vincent Boland, Prague Rise in EU cross-border deals The number and value of cross-border deals within the European Union rose to record levels in 1996, the specialist publication Mergers and Acquisitions Monthly said yesterday in its annual review. "The EU mergers and acquisitions market is likely to see the prevailing high

levels of activity continuing not only in 1997, but in the years beyond that," the report said. US companies were the most voracious huyers last year when a total of 1,994 deals touched a total value of £64.80m (\$105.62bn), in 1995, there were 1,901 European takeovers,

North American companies snapped up 460 European outfits with a combined value of £15.7bn last year. Swiss companies came in second place in terms of the value of their cross-border acquisitions and they invested £7.6bn in

EU companies, the specialist publication said. But in terms of the number of cross-border acquisitions, British companies were the second most active group behind their US counterparts. British companies purchased a total of 229 EU companies with a combined value of £6.1hn. British companies were by far the most sought after commercial property. Overseas companies purchased 391 British companies with a value of £23.4bn

Michelin faces EU inquiry

The European Commission is examining the sales practices of Michelin, the French tyre group, because of suspicions that it is abusing its dominant position in France and some other EU countries to impose unfair conditions on its dealers.

A Commission official said the probe centred on Michelin's rebate system for tyre distributors. In the early 1980s Michelin was found gullty of applying a rebate system for dealers in the Netherlands over such long periods that the dealers were hindered from selling products from other tyre manufacturers. "We are looking to see whether similar practices are taking place today," said a Commission official. Emma Tucker, Brussels

Albanian emergency urged

The Albanian government yesterday asked parliament to impose a state of emergency in the southern Albanian town of Vlore, where three people have died in a week of anti-government rioting.

Violence flared again yesterday as 30,000 people attended the funeral of a man killed on Monday in the worst unrest to affect Albania in the wave of protests sparked by the collapse of get-quick-rich pyramid investment schemes. An angry crowd set fire to the local headquarters of the ruling Democratic Party in a working-class district of Viore.

"The situation in Viore is extraordinary. It calls for extraordinary measures," Prime Minister Alexander Meski said on national radio.

Many people accuse the government of collusion with hose who ran the fraudulent funds or of failing to act i time to control the schemes. The government has denied the allegation and accused the opposition of fanning

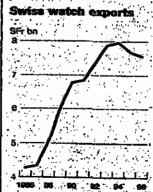

Further killing blamed on Eta

A husinessman was shot dead during a street carnival in the Basque town of Tolosa yesterday, the third killing blamed by the government on Eta separatists in two days This week's murders in different parts of the country present the biggest terrorist challenge to Spain's centre-right government since it took office nine months ago. Basque terrorism has now claimed five deaths since the beginning of the year, as many as in the whole of

Mr Jaime Mayor Oreja, the interior minister, said that the resurgence of attacks would not alter the government's policy, reaffirming its stance against opening talks with Eta. "They will obtain nothing, never," David White, Madrid

German wholesale sales fall

German wholesale sales in December fell a real 3 per cent and were a nominal 2 per cent lower than a year earlier, according to the Federal Statistics Office. In 1996, wholesale sales were a real 1 per cent and a nominal 2 per cent lower than in the previous year. in the consumer and durable goods industry, December wholesale sales were 6 AFX. Wiesbo

year fell by only 1.6 per 1985 36 90 22 96 98 cent to SFr7.55bn (\$5.24bn) compared with a 3.6 per cent decline in 1995. The

turn round the fortunes of a traditional industry which in the early 1980s seemed on tha verge of extinction. Exports to Hong Kong, the biggest market for Swiss watches and watch parts, fell for the second year running, but this was offset by continuing strong exports to the US, tha second higgest market, and Japan, where exports rose by 12 per cent, to SFr762m

Zurich, said the figures underlined the shift away from expensive gold watches, where exports fell by 5.9 per cent to SFr1.99bn, and towards steel watches, where exports rose by 24.5 per cent in value, and common metal watches (up 26.2 per cent). William Hall, Zurich

Boost for Spain's Emu target hopes

By David White in Madrid

Spain's hopes of meeting the two most crucial qualification targets for the European single currency were boosted yesterday by a report from

However, its predictions leave Spain close to the borderline on both counts. Inflation is expected to fall just within the target range, and the public-sector deficit to end the year fractionally above the 3 per cent of gross domestic product set as the objective for the euro's

in their half-yearly report, the group of seven experts forecast that inflation, meaaured year-on-year, would fall to 2.6 per cent in Decem-ber compared with 3.2 per cent at the end of 1996. Average inflation should come down to 2.7 per cent, they said, compared with 3.6 per cent last year.

This would be narrowly within the 2.8 per cent rate which they reckoned would be the qualifying limit - a 1.5 point margin over the three performers. But they (\$990m) ovarrun in last well above the Emu target of in tha last quarter to a year-warned that Spain could year's social security deficit, 60 per cent, but is expected on-year rate of 2.5 per cent.

miss the target if there were offset by a lower than expecstrong upward pressure on

They forecast that the pub-3.1 per cent of GDP, describing this figure as "a de facto fulfilment of the convergence criteria". The cantre-right govern-

ment claims it succeeded in keeping last year's deficit as planned to 4.4 per cent of GDP, compared with a revised figure of 6.6 per cent for 1995. This was in spite of

ted shortfall in the central overnment hudget.

The panel said the budget lic-sector deficit would fall to performance was significantly halped by falling interest rates, which produced savings equivalent to 0.6 per cent of GDP.

The government is counting on a lenient application of monetary union conditions for public debt. Spain's deht stood at 69.3 per cent of GDP at the end of last year, compared with a planned average of the EU's best an estimated Pta140bn level of 67.5 per cent and well above the Emu target of

The panel of forecasters

saw economic growth rising to 2.9 per cent this year, based on strong investment and a long-awaited recovery in private consumption. Their 1996 growth estimate of 2.2 per cent, slightly below government expectations, was in line with provisional figures published yesterday by the Bank of Spain in a quarterly economic report.

The bank said growth was reckoned to have picked up

TV football loss angers 5m Italians

By Robert Graham in Rome and Neil Buckley in Brussels

Pre-match fever turned to political polemic in Italy yesterday after 5m Italians realised they would be denied the right to see their the game against Italy is national football team take also restricted. on England live in tonight's World Cup qualifying game

at Wembley. Television and radio rights in Italy for the match were awarded last December to Mr Vittorio Cecchi Gori's Telemontecarlo (TMC) - hut his two channels cover less than 80 per cent of the national territory.
The Italian consumers

TMC for depriving viewers match last December. of their national right to watch the Azzurri, as the national squad is known, and Mr Walter Veltroni, the deputy premier and sports minister, was obliged to try to broker a deal yesterday with Mr Cecchi Gori and Mr Enzo Siciliano, the head of Rai, the state broadcaster.

The Italian row comes amid beated debate in Europe over the role of public service television and the market place in hidding for sports rights. The Spanish government

is planning draft legislation which would prevent companies running "pay-per-view" television services from obtaining exclusive rights to hroadcast football

place an EU-wide legal framework to prevent major sporting events becoming the exclusive preserve of pay-TV channels.

England fans' live view of

ered live on BSkyB'a Sports Channel, to which only 4m bonseholds subscribe, although many more supporters will watch the game on big screens in crowded pubs.

Mr Cecchi Gori easily outbid the Rai and Mr Silvio Berlusconi's three Mediaset channels for the television association has attacked and radio rights for the

Most of the unfortunate fans unable to receive TMC are in tha southern region of Calabria and the islands of Sardinia and Sicily. Yesterday hectic discus-

sions were taking place to find some sort of compromise. These ranged from trying to find the technical means to let Rai transmit to those areas of Italy not covered by TMC, to a deferred showing by Rai.

The blame for the mess rests between parliament and Rai. Parliament bas beec unable to agree on legislation to ensure that TMC enjoys nationwide coverage. At the same time, since losing out in its bid to continue covering Italian league soccer. Rai has been too proud The European Union is to deal with Mr Cecchi Gori.

Russian army, Mr Aslan Maskhadov, former chief of staff of the Chechen separatist forces, will today be formally inaugurated as president of the breakaway Chechen republic.

As the agonising conflict between Russia and Chechnya has shifted from war to diplomacy, the inauguration The match is being covbas become the newest weapon in Chechnya's drive

to win full independence. But international recognition of an independent Chechnya is a development the Kremlin, humillated by its military defeat at the hands of Chechen guerrillas, is datermined to thwart so far with success.

No official foreign govern ment delegations are expected to attend Mr Maskhadov's inauguration, although some of the Kremlin's most troublesome bêtes noires. including Mr Alexander Lebed, will be there.

The failure to attract official foreign visitors is likely to be a disappointment for the Chechens but, in their effort to build an independent state, the biggest sticking point is likely to be the economy, not diplomacy. .

The two-year war with Russia has transformed Chechnya into the sort of post-Industrial wasteland normaily encountered only in science fiction movies. The relics of a modern, twentieth century society are there: high-rise apartment buildings with plumbing, electricity, television sets and videorecorders; a public transport

They operate in a them, are the chief source of entrepreneurs. "Having stocheaply than we can." Mr Khamidov says.

Some of Chechnya's more starry-eyed statesmen bope this frail oil industry, which in the 19th century ottracted British entrepreneurs whose Victorian homes form one of Dzhokhar-Ghala's most elegant suburbs, will be the and the pipelines leading to hasis of the region's eco-

The most ambitious scheme, batched with advice from Mr Adnan Khashoggi. the Saudi Arabian financier, and Mr Jacques Attali, former president of the European Bank for Reconstruction and Development, is a 53bn project to build a pipeline from the Caspian Sea region and central Asia to Black Sea and Mediterranean ports - all, of course, via Chechnya.

It is hard to see such a grandiose project coming off. A more modest, but more plausible, source of economic renewal seems to be the unquenchable entrepreneurial zeal of individual Chechens.

Even in the rubble of Dzbokhar-Gbala, Chechens have set up thousands of small businesses, from oneroom tea shops, to stands selling fresh caviar in the bazaar and "Cbecben Aerospace Rommunikation", two hrightly lit sbops offering satellite telephone connections. Internet links and computer services 24 hours a day. It was businesses like these, and the lack of import barriers, which succoured Chechnya before the war with Moscow, when the region prospered as a de focto duty-free import-export zone on Russia's southern flank.

As be assumes the presidency today, Mr Maskhadov will have to hope that this energy will enable Cbecbens to create a grassroots economy of their own and help them rebuild their country without Russian help,

Talks start on reform of Italian state

By Robert Graham

Long-delayed discussions on can be reached in a transparinstitutions of the Italian motives". stats got under vesterday amid hopes that the national interest would be placed above party poli-

Discussions will focus on such as issues as strengthening the powers of the prime minister and his direct election: making the two houses perform separate functions to end the current time-wasting bi-cameralism; and the relationship of the judiciary to the legislature.

The first session of the special 70-strong parliamentary commission was inaugurated by the chairman, Mr Massimo D'Alema, leader of the Party of the Democratic Left (PDS).

Mr D'Alema, whose party is the dominant partner in the centre-left government, has staked his credibility on pushing through reforms to modernise the state and make government work better in the interests of ordi-

nary citizens. Reform of the 1948 constitution has been talked about for more than a decade; bowever, all such efforts have foundered on a mixture of political inertia and in-fighting aimed at protecting vested interests.

Parliament agreed last July to press ahead with a commission to draw up proposals, but it has taken six months of hard bargaining to get things started.

Mr D'Alema observed pointedly yesterday: "In our country there is a strange sentiment whereby everyone wants reforms, but any deal is viewed with suspicion. I.

on the other hand, believe in agreements and that they overhauling the creaking ent way without ulterior

> In the past two weeks. M Silvio Berlusconi, leader of own 84.5 per cent of it. the right-wing opposition, has dropped his reservations about the commission. This has led him to endorse Mr D'Alema's chairmanship and the two leaders have established an informal understanding allowing them to work towards a common goal of reform.

The nnderstanding between the two has caused considerable friction with Mr Berlusconi's main ally, Mr Gianfranco Fini, head of the right-wing National Alliance (AN). AN showed its warlness of the commission'a brief hy refusing to vote for Mr D'Alema.

Equally, some politicians in the ruling centre-left alliance have voiced concern over the implications of a cross-party deal between Mr D'Alema and Mr Berlusconi.

The hardline marxists in the Reconstructed Communism (RC) party have threat-ened to undermins the commission if Mr D'Alema gets too close to Mr Berlusconi. Underlying these concerns

is a fear that cross-party co-operation on constitutional reform could lead to the emergence of a different government majority and a consequent change in the premiership. The commission must con-

clude its work by the end of June. Mr D'Alema said yesterday the first months would be taken up purely with discussions. Agreements on individual proposals would only be sought in May and June.

Treasury urged to buy Bank of Italy

The Italian Treasury was yesterday urged to transform the ownership of the country's central hank by buying out the banks and savings institutions

The prestigious Istituto Ugo La Malfa in a report on the country's banking systsm said that this would also help reinforce the weak asset base of the country's publicly owned banks at a time when privatisation was an increasingly central

Yesterday's study estimated the notional value of the banking institutions' combined stake in the central hank at L38,212bn (\$23.3bn), based on the Bank of Italy's 1995 balance sheet with nominal capital of L300m, reserves of L9,178bn and L35,503bn in funds to back gold reserves.

The biggest shareholder is Cartple with 10.35 per cent; savings banks account for 56.24 per cent; and commercial and merchant banks own 28.26 per cent. The remainder is owned by insurance companies and Inps, the state pensions

In most cases the shares are written down as assets with a nominal value. But based on the central bank's 1995 balance sheet, the report showed, Cariplo's stake would be worth L8,750bn, close to the value of its current net assets of L10,453bn. The troubled Banco di Napoli's share would be worth L2,862bn.

The study recognised it would be difficult to establish a realistic price tag on these shareholdings since the circumstances were unique.

Mauritius looks for its place in the sun

The island must reinvent itself to survive the passing of protectionism. Michela Wrong reports

The lesson of the Dodo,

is clear, adapt or die.

It is a lesson the Island

the Mauritian national symbol

ow appropriate that Mauri-tius should have cbosen the dodo as its national symbol. A sitting target, the flightless bird was exterminated by Dutch settlers on the Indian Ocean islands in the 17th century. The lesson was clear: adapt or die. It is one Mauritius has taken to beart.

With no natural resources to boast of, apart from its azure beaches, it has nonetheless turned itself into an economic success story by cannily spotting a series of market niches and swiftly evolving to exploit them.

The question for lts 1.1m citizens now is: can Mauritlus continue to perform the same miracle of reinvention, or has more than a decade of prosperity dulled its competitive instinct?

For the nicbes on which Mauritius has built average per capita incomes of \$3,400 - equal to the highest on mainland Africa - may be about to disappear. Most were based on market protectionism but that is no longer fashionable.

The Lomé convention, which gave Mauritius preferential access to European markets, propped up its sugar industry.

An unexploited textile import quota with the US drew Indian and Chinese companies which had saturated their own national quotas to Mauritius's export-processing zone (EPZ). Local companies, tapping a well educated workforce, soon joined the race to supply the west with high-quality clothing. It was only in tourism that Mau-

ritius competed opeuly with the Lome is due to be renegotiated in 2000 and its tenets now jar with the

MAURITIUS

nations, with cheaper labour costs. are vying for Mauritius's textile At the same time, the tourism industry is approaching saturation

point, with local operators admitting the islands may not be able to year's record 487,000 visitors without suffering serious environmen-

"We are trying to identify what is going to be the next strategic resource we can build on," says Mr Mitrajeet Maraye, central bank governor. "We have to find our place in the sun."

For some, part of the answer lies on a hill overlooking the capital, Port Louis. It is there that Mauritius's Export and Development the creation of a freeport, expan-Authority (Media) has built Infor- slon of offshore banking, manufacfree trade philosophy of the World matics Park, a hangar where for-trade Organisation. Other African elgn companies specialising in emisation of the textile and sugar reminiscent of pre-Thatcherite

information technology benefit from state-of-the-art telecommunications and tax incentives.

D&H Computer Services, a British software company, was one of those lured by the prospect of high skills for relatively low wages. "The akills we need are very expensive in the UK. Here salaries are four or five times cheaper, so we can get new products to market four or five times faster," says Mr John Douglas, its director.

About 80 per cent of the building is already occupied and Media is thinking of putting up a second. Mr Chand Bhadain, Media's head, does not expect the venture to replace an EPZ that employs 80,000 people. But he believes that, along with

industries, It will form part of the transformation of Mauritius into a busy bub linking Asia to Africa.

Optimists believe that having established a solid international reputation for excellence, Mauritius can remain ahead of the pack even when protectioniam evaporates. It should now model itself on Singapore, they argue, rather than trying to match rock bottom wages offered by African rivals.

growth rates of over 6 per cent have hred exaggerated expectations. A population used to nearfull employment, free education, bealth care and subsidised foods could be in for a rude awakening. Businessmen know that if Mauritius is to thrive in the long term some tough decisions must be

GE pulls out of talks |Aircraft on new Airbus engines Korean

By Michael Skapinker, Aerospace Correspondent

General Electric of the US said yesterday it had pulled out of negotiations to build engines for a 375-seat aircraft planned by Airbus Industrie, the European manufacturing consortium. because of differences over the sharing of development

GE's two large international rivals, Rolls-Royce of the UK and Pratt & Whitney of the US, said they were ready to talk to Airbus about providing engines for the aircraft, which is designed to compete with the Boeing 777 and the smaller version of

the Boeing 747. The decision by GE and Airbus to end negotiations comes amid intense discussions by aircraft and engine manufacturers over what large jets airlines are likely to need in the 21st century. Boeing last month scrapped plans to huild a 550-passenger version of lts 400-seat 747, saying there was insuffi-

cient demand for the aircraft.

patiale of France, Daimler-Benz Aerospace of Germany, British Aerospace and Casa of Spain - is pushing ahead with plans to huild two new aircraft. One is the A3XX, a 550-seater. It also plans to build the A340-600, which would stretch its existing A340 model from 300 seats to 375. Airbus says the aircraft sbould enter service in 2001. All three large engine makers are bldding to work on the A3XX. GE and Pratt & Whilney have joined

offering variations on its existing engines. Airhus decided last year, however, to talk exclusively to GE about engines for the A340-600. The existing version of the A340 is powered only by CFM engines, manufactured by a joint venture between GE and Snecma of

forces to develop engines for

the 550-seater. Rolls-Royce is

Airbus and GE said they

cations for the A340-600 engine. But they had failed Airbus - owned by Aerosto agree a financial package which would have allowed them to work together.

Analysts estimate Airbus would be able to develop the aircraft for about \$2bn. This is relatively low for a new aircraft development, because the A340-600 would be based on an existing model. GE would, however, have had to develop a wbolly new engine, at an estimated cost of \$1bn.

Rolls-Royce said yesterday that it was interested in talking to Airbus and would be able to base an engine for the aircraft on its existing technology, Pratt & Whitney said it would bave to talk to Airbus to determine what type of engine was required. But the US company said: pursuing it."

Airhus said it had not yet decided whether to talk to another engine maker on an exclusive basis or enter had agreed technical specifi- both large manufacturers.

maker in

By Michael Skapinke

Europe's leading regional aircraft maker said yesterday it was talking to four Sonth Korean companies about working together on a new 70-seat jet.

Aero International Regional (Air) – owned by Aerospatiale of France, British Aerospace and Alenia of Italy - said it was talking to Samsung, Daewoo, Korean Air and Hyundai abont the aircraft. If agreement is reached, the four Korean companies would contribute to the cost of the aircraft and build some components.

Sonth Korean companies have been searching for several years for a way into the regional jet market. Korea was excinded last year from a consortium, led by China, which plans to build a 100seat jet. Aviation Industries of China (Avic) and Singapore Technologies have agreed with Air to build a

100-seater. Samsung then turned its attention to Fokker, the Dutch aircraft maker which vent bankrupt last year. Earlier this year, however, Samsong said it was no lon-ger interested in bnying Fokker. The Korean company is believed to have lecided the problems facing Fokker would be too expensive to overcome.

Air says it wants to see the new 70-seater enter service early in the next century. It has short-listed two possible engine manufacturers: General Electric of the US and a joint venture between Pratt & Whitney of the US and Snecma of France. Air says it hopes lo sell 600 of the aircraft and is already having discussions with airlines.
The four Korean compa-

nies are also interested in participating in the development of large aircraft. They have had discussions with Airbus Industrie, the European consortium, about participating in the development of the A3XX, a planned 550-seat jet.

By Guy de Jonquieres and Stephen Fidler

The Asia Pacific Economic Co-operation forum needs to clarify this year its plans for free trade if it is to continue to develop, Dr Herminio Blanco, trade and industry minister of Mexico, an Apec member, said yesterday.

He said the issue should be discussed before leaders of Apec's 18 members which account for about half of world economic output and trade - meet in Vancouver in November.

The talks could be difficult, he said. "If you want to have a very destructive meeting, you say: What do you mean by free trade?" That is seen as a spoiler, It isation rules, and how will create lots of fights. Free trade for lots of countries has a very different

meaning," he said. land wanted Apec to develop into a free trade area, but ing ones. However, many other members, such as Malaysia and Japan, thought differently. It was also unclear whether Apec's free trade

Herminio Blanco: free trade for lots of countries bas a very different meaning

plans required China to embrace World Trade Organquickly, he said.

Apec is committed to freeing all trade and investment in the Pacific Rim region by Australia and New Zea- 2010 in industrialised countries and by 2020 in developquestions remain unanswered, including whether all tariffs would be abolished

Turning to trade agree-Blanco said it was important for US President Bill Clinton to show progress in securing fast track" trade negotiating authority from Congress before he attended a summit of north and south American leaders in Brazil in May. Such authority needed to cover Chile's accession to

the North American Free Trade Agreement. But a US mandate to push ahead with plans to create by 2005 a Free Trade Area of

the Americas (FTAA) was less urgent, because no negotiations were likely this

Dr Blanco rejected suggestions by some other governments that an FTAA, embracing the whole of the Americas, could be achieved through negotiations hetween Nafta and Mercosur, the four-nation South American trade grouping. He said such an approach would he "an insult" to

sur - a customs union with eventual pretensions toments in the Americas, Dr political union - was a different body to Nafta, which was strictly a free trade area.

The only practical approach was for all countries to agree on the disciplines for a hemispheric accord which would have to go beyond the World Trade Organisation rules - and then to agree on the terms of

Dr Blanco said work was continuing on extending Mexico's network of free trade agreements with other Latin American countries. Five were already in place with Chile, Colombia, Venezuela, Costa Rica and

Two others were very advanced: one with Nicaragua and one with Honduras, Guatemala and El Salvador negotiating together. Other negotiationa were under way. "Wa are in the process of negotiating with everyone on the continent except Mer-

All lines lead to Dublin for Compaq callers

The dialling tone will seem familiar, as will the language on the end of the line. But from the and of this year a call to the local representative of Compaq Computer in Paris or Prague or any of 12 European countries, will be routed to Ireland and answered in the

language of the caller. The deal announced yesterday, in which the world's leading personal computer company is investing \$10m to set up a multilingual pan-European customer support centre in Dublin, is just the latest in a string of investments attracted to remote locations sucb as Ireland because of advances in tele-

distribution centre in the Netherlands and a manufacturing base in Scotland, is creating 550 jobs in Ireland over the next three years, 60 per cent of them for people speaking several languages, to provide a 24-hour computer care service in up to 15

different languages. With little to distinguish the different hrands of personal computers on the mar-ket, Mr Ian Jackson, director of Compac's UK consumer Andreas Barth, Compac's and retail business, says general manager for Europe, companies are recognising Middle East and Africa, said the key sales advantages of he expected the hardware good after-care service.

EU, Asean face testing encounter

By James Kynge Neil Buckley in Brussels

Foreign ministers from the European Union and Asia will this week engage in a testing diplomatic encounter: to add substance to the vague optimism of a new dawn in relations between the two regions.

But snch hopes appear imperilled by disputes over human rights in Burma and East Timor. The increasingly assertive nations of Asia have made clear Europe cannot hope to deepen economic ties with the world's fastest growing region unless it becomes less confrontational on buman rights.

That issue could make or break the talks in Singapore tomorrow between the 15 EU countries and the seven members of the Association of South East Asian Nations (Asean), and on Saturday between the EU and Asean, plus China, Japan and South Korea. The weekend meeting will be the first foreign ministers' meeting between the countries which took part in last year's inaugural Asia-Europe summit in Bangkok, at which the optimistic outline of EU-Asean relations

Singaporean officials said Asean had informed EU officials that if the Europeans raised the issue of Indonesia's occupation of East Timor, the "wbole [EU-Asean] relationship would be seriously affected". Indonesia has won Asean's backing to disrupt the meeting if Portugal, which previously ruled East Timor, raises it.

Even more sensitive for the EU is Burma, expected to join Asean later this year. EU ministers have expressed concern over buman rights abuses there, and bave suspended Burma's tariff

The concern in Brussels is that Burma's entry into Asean could strain relations with the whole grouping for as long as Rangoon's military rulers remain in power. One EU dipiomat said Burma's accession to Asean. As tariff and non-tariff which groups Singapore, barriers within both Asean Malaysia, Indonesia, Thaland the European Communing. Initially, an artificial state governments, will be land, Brunei, Philippines and Vietnam, could be interpreted in Rangoon as endorsement of its attempts to suppress Ms Aung San Suu Kyi's democracy movement.

EU sources suggest ministers will try to find a diplomatic solution allowing an the political situation in bave been a success".

Burma to appear in the meeting'a final communiqué, Assuming that is diplomatically possible, talks on boosting trade and promoting investment will top the agenda. Asean officials said trade and investment with Europe bad lagged behind its potential. Total Asean-EU trade in 1995 was US\$99.5bn, while Asean-US trade was nearly US\$110bn, according to Singapore'a data.

Ms Yeo Lay Hwee of Singapore's Institute of Policy Studies said one measure of the meeting's success would be if agreement were reached on the Asean-EU "Action Plan" to replace the expired EU-Asean agreement of 1980 which sets out the foundation of their co-operation on issues such as trade. This agreement has not been renewed mainly because of a disagreament between Indonesia and Portugal over a buman rights clause.

Such an action plan might non-tariff barriers, the promotion of investment, co-operation in science and technology, and the set-tiog-up of European Business Information Centres in Asean countries. The EU desire to forge

closer trade links with Asia has been brought into focus by the success of the US in boosting American investment in the region.

As tariff and non-tariff nity are dismantled, the two cap will be put on the trading blocs are starting to regard each other as increasingly attractive partners.

This week's talks, therefore, could bave a real impact. But in the eyes of Ms Yeo, "if there is no 'Action Pian', just a final declarauncontroversial reference to tion, the meeting will not

As if to point to Singapore's belief that Hong Kong would continue to prosper, he said Singapore'a Government Investment Corporation "has invested. and is continuing to invest, a few billion dollars in Hong Kong".

Australia's 'national grid' starts to become reality

power generation industry, and eyes tend to roll. "Don't call it that," says Mr Keith Orchison, executive director of Australia'a Electricity Supply Association. *Call it a competitive electricity supply market".

Five years ago, Australia began to talk of moving away from its traditional system of power generation. which had been the province of large public-sector utilities acting as monopolies within their state.

Instead, politicians and industrialists envisaged a aystem where generators, distributors and end-users could compete to supply and buy electricity across state lines, loftily tagging this a "national grid". Next month, this concept starts to become reality, but it will remain a much more modest endeayour for the foreseeable Under the new system,

generators in just two states, New South Wales and Victoria, will start to compete to supply each other's market. Both jurisdictiona bave developed separate competitive pool pricing systems in the past year, managed by the Victorian Power Exchange and Transgrid, respectively. These will now be linked, so that if cheaper energy is available interstate, it will be imported. The marginal generator in either state will, in effect, set

the wholesale price. amount of electricity which can be transmitted across the border. Responsibility for power system security will also remain state-based. Hydro-electric power generated in the Snowy Mountains, and currently supplied nomic benefits a progressive to both NSW and Victoria, will be traded into

ention the term But the link-up between states arrangements laid out when "national grid" around Australia's is likely to remain a modest endeavour, writes Nikki Tait

both markets separately. By mid-1997, the changes should become more meaningful. The transmission cap will go, and Mr Brian Spalding, general manger of market development at Transgrid, bopes power system security can be managed nationally". The Snowy "corporatised", and supply the joint market directly.

Even if the NSW-Victoria link-up goes to plan, a bigger question for Australian industry is bow quickly these first steps can be built on, and what kind of ecorestructuring will deliver.

The driving force behind

private bids were solicited in pool prices in Victoria has been noticeably more marked than in NSW.

'To add to the difficulties, Australia'a alectricity deregulation is taking place in the context of a huge landmass. Western Australia was always going to be excluded from a "national grid" because of the inter-vening desert. But interconnection facilities are also limited on the east coast, with Queensland and Tasmania isolated from South Australia-Victoria-NSW.

While a cheer may go up when NSW and Victoria finally link, further progress will not come quickly. South Australia, which has generally imported alectricity from Victoria under contract, is expected to be a player in the Victoria-NSW market, but in a smaller way than the two founding

A bigger question looms over Queensland, with one of Australia's fastest growing populations. It has a rising electricity demand, while NSW and Victoria tend to have excess capacity. But with no transmission link to New South Wales, Queensland's participation in the "national" market is unlikely before rext

Finally, there is the question of what benefits this process will deliver. Electricrestructuring – and made ity prices have already fallen the Australian electricity significantly for business deregulation model unique - users. Figures show commeris that state governments of cial users in NSW saw a 33 different political bnes have per cent drop in real terms between 1990 and 1995, while industry faced an 18 per cent reduction. This is variously attributed to elimination of cross-subsidies, a fall in energy prices, capital restructuring, and some sta-

bilisation in demand. How much more will be achieved by the interstate market is moot.

Perhaps the big plus is that Australia is undertaking this restructuring later than some other countries, and can learn from their mistakes. People with experience of the UK deregulation, for example, are now working in Australia.

there are now three generators and six distribution NUS International, the units, all publicly owned. utility consultant, suggests This makes any merger of that while the Australian the state markets compliarrangements are probably cated. ASIA-PACIFIC NEWS DIGEST

South Korean MPs arrested

Two prominent MPs from South Korea's ruling party were arrested yesterday for allegedly accepting bribes in a loan scandal involving the Hanbo steel and construction group, which went bankrupt last month.

Mr Hong In-kil and Mr Chung Jae-chull were accused of receiving Won800m (\$920,000) and Won100m respectively from the head of Hanbo to press banks and other financial institutions to lend nearly \$6bn to the financially troubled group for a huge steel mill.

The arrests represent a damaging blow to Mr Kim Young-sam, the South Korean president. Mr Hong is regarded as one of Mr Kim's closest sides, which gained him the nickname "the president's butler". Mr Chung is the third-ranking official in the governing New Korea

Prosecutors allege that Mr Chung also transferred Won100m in Hanbo bribes to Mr Kwon Roh-kap, a senior opposition MP, to prevent him from raising parliamentary questions about bank loans to Hanbo. John Burion, Seoul

Hashimoto's popularity dips

Popular support for Mr Ryutaro Hashimoto, the Japanese prime minister, has fallen by 13 percentage points over the past two months, according to a newspaper poll yesterday. He won 42 per cent approval in a poll by the centre-left Asahi Shimbon newspaper, traditionally a critic of Mr Hashimoto's Liberal Democratic party, down from 55 per cent in the most recent survey in December. Those who positively disapproved of the Hashimoto government rose by 10 points to 37 per cent.

Dislike of the 1997 budget containing tax increases and rises in public works spending was blamed for the decline in support, along with voters' scepticism that Mr Hashimoto would be able to deliver on promises to streamlina Japan's large and powerful public William Danokins, Tokyo

US apologises for N-bullets

Senior US defence officials yesterday apologised to the Japanese government and Okinawan local administration for the accidental firing of radioactive bullets in air exercises over the southern Japanese island. The apology, to Mr Kunihiko Saito, Japanese ambassador to the US, came in response to public Japanese concern that Tokyo was not told about the accident until last month, about a year after it happened. US jets fired more than 1,500 rounds of uranium-tipped bullets, inadvertently labelled as normal munitions. William Dawkins, Tokyo

Canberra trims benefits

Australia's federal government yesterday saw part of its budget arithmetic restored, when two independent senators last night voted to support measures restricting newly arrived migrants' access to social security benefits. The senators had previously voted against the measures, causing them to fail to pass in the Senate, where tha

Liberal-National government does not have a majority. The measures backed by the two senators yesterday are estimated to save spending of about A\$200m (\$154m) over four years. Further measures, also related to social security benefits for migrants and worth a similar amount, are dua to be debated in the Senate again Nikki Tait, Sydney

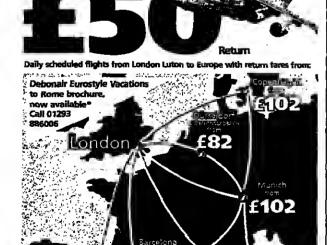

Interest rate cuts unlikely

Mr Ian Macfarlana, governor of Australia's Reserve Bank, last night played down the likelihood of further short-term interest rate cuts. He told a Sydney audience the bank was looking with "some interest" at the impact of three cuts in official rates in the second half of 1996, when the economy was thought to be flagging. "Our

feeling is that some of the effects are coming through." He acknowledged inflation pressures in Australia were nodest, and suggested the outlook for economic activity in 1997 was good. Longer-term, the bank had to pay attention to possible wage and price inflation

Growth in US productivity

The productivity of American businesses grew at the fastest rate in three years in the final quarter of last year, the government said yesterday.

The Labor Department said productivity outside the agricultural sector rose 2.2 per cent in the fourth quarter of 1996, a sharp improvement from the third quarter and the largest since a 2.8 per cent gain in the fourth quarter

The rise exceeded the expectations of Wall Street economists, who had been looking for productivity growth of 2.1 per cent.

For 1996 as a whole, productivity rose 0.8 per cent, the best performance since a 3.2 per cent rise in 1992, but still slower than the longer term trend of annual growth of slightly over 1 per cent. In the fourth quarter, productivity jumped as output soared 5.9 per cent while

the total number of hours worked rose 3.7 per cent. Unit labour costs, which make up two-thirds of production costs, rose 1.4 per cent in the fourth quarter after 3.3 per cent the previous quarter.

Cuban culture chief sacked

A veteran of Fidel Castro's 1959 revolution and leading ideologue of Cuba's one-party Socialist system, Mr Armando Hart, has lost his job as culture minister after more than 20 years in the post.

Mr Hart has served continuously in the government since 1959, first as education minister and then as culture minister. No reason was given for his substitution, announced briefly in Granma, the official Communist . party newspaper. Now approaching 70, he was believed to be suffering from health problems.

He was replaced as by Mr Abel Prieto, president of Cuba's official Writers and Artists Union (UNEAC). Mr. Prieto was among a number of younger cadres elevated to the party politburo in October 1991. The substitution does not signal a change of political direction by Cuba.

President Castro said last week there would be no transition from socialism to capitalism while a single 🐺 revolutionary remained alive. ... Pascal Fletcher, Hapana

Colombia, UK in crime pact

Colombia's foreign minister, Ms Maria Emma Mejia, yesterday signed an agreement with Britain in London. allowing each country to seize assets gained from serious crime at the request of the other.

Colombia passed legislation in December strengthening Its ability to confiscate assets on behalf of other countries; paving the way for this agreement. It will come into force. after certain legislative procedures have been enacted in

Ms Mejia said yesterday Colombia was close to :" finalising a maritime agreement with the US aimed at reducing the flow of illegal narcotics by sea from Colombia and the illegal imports of precursor chemicals used in drugs manufacture. However, there would be no question of automatic US access to Colombian territorial weters.

Stephen F.
Colombia's second largest guerrilla army threw its

weight behind a national strike yesterday, vowing to back workers' demands with "violence and grassroots

The Cuhan-inspired National Liberation Army (ELN) said the strike by state workers had to be backed by armed force if it were to succeed in getting its demands met by what it called the "narco-bourgeoisie" of President Ernesto Samper's government.

Boesky settlements approved

A US federal judge in New York has granted final approval to \$68.9m in settlements of investors' civil lawsuits against Mr Ivan Boesky, the former arbitrageur, and others involved in the 1980s financial market scandals. The move on Monday resolves all the outstanding .

Boesky-related legal matters, according to an attorney for the investors suing Mr Boesky.

The investors will receive \$20.1m from Mr Boesky and the other defendants, who include Mr Martin Siegel, former head of mergers at Kidder Peabody, and Mr Robert Freeman, former Goldman Sachs trader They will also receive \$48.7m in restitution that the defendants previously agreed to pay the Securities and Exchange

The deadline to file proof of claims in connection with the settlements is March 21, and investors are expected to start receiving payments shortly thereafter. The investors had alleged that they were defrauded by the defendants' insider trading and collusion with Mr Michael Milken, the AP-Dow Jones, New York former junk-bond king.

Clinton upbeat on budget accord

By Bruce Clark in Washington

President Bill Clinton said yesterday that he and his Republican adversaries could "do great things together" by co-operating over important public issues, including the balancing of the US

Mr Clinton struck an npbeat note as he held an unusual meeting with senior Republican legislators, whose controversial effort to enforce fiscal restraint by altering the House and Senate, as well as the constitution appeared to have four prominent Democrats. the constitution appeared to have

The balanced budget amendment, e Republican idea that the president and fellow-Democrats for America," he said, while hail-

ANNOUNCEMENT OF TENDER PROCEDURE

SCHIPHOL GOLF & BUSINESS CENTER

Amsterdam Airport Schiphol wishes to meet investors and/or operators for the realization of the Schiphol Golf & Business Center.

Project Description:

The Schiphol Golf & Business Center will comprise a four-star 200-room hotel with conference and leisure facilities and an 18-hole golf course to international standard with practice facilities.

Project Location:

The site available for this project covers an area of 73 hectares (180 acres) close to the airport, 10 minutes by road from the Terminal and 15 minutes from the commercial and business centers of Amsterdam.

The site is the property of Amsterdam Airport Schiphol and will be offered for long-term lease. A concession agreement will be concluded for the operation of the hotel and golf course. Interested parties should be willing both to invest in the project and to undertake its development and operation.

Closing date:

Interest may be expressed until 26 February 1997.

Further information: Applications, in writing, for further information may be addressed to:

Amsterdam Airport Schiphol, Schiphol Real Estate, PO Box 7501, 1118 ZG Schiphol Airport, The Netherlands, tel.: (+31 20) 601 +1 10, fax: (+31 20) 601 37 01

Defence Correspondent

Babcock, the company which owns the Rosyth naval dockyard in Scotland, reacted angrily yesterday to refreal to disclose the costs of new nuclear facilities to be built at the rival Devonport yard in south-west England.

Devonport was originally awarded the contract to build dry docks for Trident nuclear missile submarines following a fierce bid battle with Rosyth in 1993. But in more than three years of negotiation over the terms of the contract, the costs have spiralled to well over the levals tendered by both yards in

Irish premier warns IRA

Mr John Bruton, prime minister of the Republic of Ireland, yesterday reaffirmed his commitment to the search for a settlement in Northern Ireland and announced plans to visit there this month ahead of his annual trip to the US for the St Patrick's Day celebrations

Mr Bruton warned Sinn Féin, the political wing of the hish Republican Army, that the long-running talks about the future of Northern Ireland would continue without it

7

- - + 14

if the IRA failed to abandon violence. Writing in the Belfast Telegraph, a Northern Ireland newspaper, Mr Bruton rejected Sinn Fein's charges that the IRA's 1994-96 ceasefire had been frittered away by British government inaction, pointing out that Sinn Fein had been given "a degree of access unprecedented for a political party of this size".

Speaking yesterday in the Dail, the lower House of the Irish parliament, Mr Bruton said the talks remained the "primary axis" of contact between the parties, but said his plans to travel to Belfast were aimed at comenting contacts with a wider section of Northern Irish opinion.

TRUCK OBSTRUCTIONS

Bridge work may be delayed

Strengthening Britain's bridges to carry new EU-approved 40-tonne trucks may take at least until 2005 at least, the House of Commons Transport Committee said yesterday. It was supposed to be complete by 1999.

The committee said Britain's roads and bridges were deteriorating fast because of government cuts in the maintenance budget. "If bridges are unable to cope with heavy lorries, they will have to be closed or weight limited in some way," the committee said. "Such measures could isolate many businesses from the road network, and there are likely to be many instances where firms will suf-

Mr Edmund King, head of campaigns at the Royal Automobile Chub, said: "Recent high-profile closures of major bridge links on busy routes provide an early taste of the chaos likely to ensue."

■ TAX COLLECTION

Bankers protest at new powers

The British Bankers' Association yesterday lobbied the government in an attempt to block provisions in the finance bill which would give Customs & Excise officers new powers to collect unpaid tax.

A controversial clause in the bill allows officers to demand payment of a bill from any bank, company or individual that owes money to a taxpayer in default.

It is understood that the Customs department will seek to emphasise that the proposed rules will be used only in restricted circumstances and could help save companies from insolvency. But the association fears that the rules would be used to demand payments from banks. It is also concerned that they threaten banks' right to set off accounts held by the same customer. Bankers fear Customs could target accounts in credit, leaving the bank with those in debt.

MERGERS AND ACQUISITIONS

Non-UK companies invest more

Companies based outside Britain stepped up their spending on UK acquisitions from £1bn (\$1.63bn) in the third quarter of last year to £2.3bn in the fourth, the Office for National Statistics reported yesterday. Spending on domestic mergers and acquisitions by UK companies declined from £8.9bn in the third quarter last year to £4.3bn in the fourth. Overall, the level of acquisition activity in the UK was lower in 1996 than in 1995. The office said UK companies spent £11.5bn on acquistions in other countries, down from £12bn in 1995. trouble in the late 1980s. BCCI could fund the loans only by stealing £500m from the account of the Sheikh of Abu Dhabi, the court heard. Mr Gokal denied conspiring with BCCI management to defraud the bank's depositors and deceive its auditors Price Waterhouse. He denied a further charge of conspiring with BCCI management to account falsely to allow the secret funding of his empire to continue.

His lawyer said Mr Gokal was a victim, not a perpetrator, of the BCCI fraud. "His companies were improperly used by BCCI, unknown to him, as vehicles for fraud." Mr Gokal's signature had been forged by BCCI staff on many

■ CONSERVATIVE PARTY

Premier rebukes health minister

The issue of leadership of the Conservative party returned to the fore yesterday after Mr John Major, the prime minister, told Mr Stephen Dorrell, his increasingly prominent chief health minister, that Mr Dorrell had no role in the party's attacks on opposition plans for devolution of gov-

ernment in Scotland and Wales. Mr Dorrell contradicted policy on Monday when he appeared to suggest that in the long-term the Conserva-tives might abolish a Scottish parliament - one of the main planks of the opposition Labour party plans for constitutional reform. Mr Dorrell's re-positioning on the European Union, from ardent supporter to sceptic, was understood to have annoyed Mr Major, who saw his moves as a pitch for a leadership contest that would prob-

ably follow a general election defeat. The government has not ruled out legislation to make denying the existence of the Nazi holocaust a criminal offence, Mr Major said yesterday. He told MPs he wanted further consultation with Britain's Jewish community before making a final decision. John Kampfner

INTERNET

Number of reservations doubles

The number of British companies reserving their names on the Internet has almost doubled in the past six months, with more than 40,000 now registered, according to the latest figures from Nominet, the authority charged with assigning names in the UK.

Some of the companies are rushing to register because of the risk of finding that their name has already been registered by another similarly-named company, says

It controls Internet addresses ending with .uk under delegation from the Internet Assigned Numbers Authority, which is charged by the voluntary Internet Society with ensuring that names are unique. James Mackintosh

of the eight-year government experiment with two groups of 300 cattle showed the greatest risk of infection was in calves born in the five months before BSE was diagnosed in their mothers. It confirmed that 10 per cent of such calves were at risk of developing BSR.

But within that 10 per cent, only 7-8 per cent appeared to receive the disease directly from their mothers. Extrapolating from the experiment to the national herd, fewer than 1 per cent of calves are likely to catch the disease from their mothers, given a fiveyear incubation period, said

Prof Anderson. The remaining 2-3 per cent in the experimental group appeared to have a genetic predisposition to the disease, which was then triggered by eating BSE-contaminated feed. Such feed was officially banned in 1988 but entered the feed chain until 1993, he said. The government would

not comment on the findings, saying its scientists were still comparing the experiment's findings with BSE cases in the field.

Privatisation winner runs transport in Lyon and Dresden

French group joins rail venture

'a myth'

Employment Editor The UK government is accused today of exaggerating the country's record in tackling unemployment compared with that of France and Germany.

The UK Trades Union Congress says in a report that if all those people who say they want to work are taken into account in Britain, Germany and France, the UK's jobless total would be higher than those of the other two. Official figures for the UK from the European Union's

latest labour force survey for 1995 show that more than 2m people in the UK are not counted as unemployed by the standard international definition compared with 340,000 in France and 850,000 in Germany. The International Labour

Organisation's definition covers those looking for work in the past four weeks and those who are able to start a job in two

The TUC says that while 15 per cent of the UK labour force were either actively looking for work or said they wanted a job, the comparable figures for France and Germany were 13 per cent and 10 per cent respectively. UK government claims

represent only the tip of the iceberg of Britain's real jobs problem." said Mr John Monks, the TUC general sec-"Their claim that Britain'a

hire and fire policies have put us ahead of the French and Germans are a myth. Millions who want to work are simply not counted." The TUC said that while unemployment had fallen in the UK since 1995 while it had risen in France and Germany, "even making a rea-

sonable allowance for this, it

would still leave the UK

and more. It is no flash in the pan. Henceforth this will be the routine, with the number of new The second secon series increasing in something more than geometric progression the state of the s as Channel 5 comes on stream The San Charles State Francis of Day of the next month, then in mid 1998 (perhaps) digital terrestrial tele-vision with its 30 or so channels, and, possibly even sooner, digital satellite with 200 or more. Few if any of these new services will offer anything comparable the feeting of the second in quality to Pride And Prejudice, The House or Drop The Dead Donkey: the industry has neither the talent nor the money to do it. BSkyB which has positioned itself so cleverly at the centre of so much of this new activity. even in instances where its old Active at a very service and a service at a competitors, BBC and ITV, are involved, is already running The second of th more channels than the whole of British terrestrial television, yet spending a fraction of the money

on making programmes. And that will be the pattern. Most of these networks will hay existing material and specialise: all food programmes, pay-per-view movies, "golden oldies" and

Television/Christopher Dunkley

ARTS

All schlock and superficiality

so on. When they do create their decorated in Playschool colours anything we'll ever get in the and beyond that to music hall own material, the evidence suggests It may well be the sort of programme already very familiar to us, locked in a studio and spun out of nothing: a blt of toplcal chit chat (but nothing too taxing), some jokes (though none that might offend), a hit of music, e guest or two (though nobody too serious), lots of bright lights, sets in the colours of boiled sweets with dry loe, and to present it all, of course, some fashlonahle figure - an "alternative" comedian, a disc jockey, a sportsman - preferably with an accent that keeps forcing its way into your conscious-There has been a whola raft of

programmes of this sort starting this season without any help from alternative technologies. Last Chance Larrery on Channel 4 on Saturdays is a typical example. A young man described as a

been whipped into a frenzy by a shaped" says the presenter and they howl with mirth.

alf an hour after

that ends Channel 4 screens another called The Show. Bob Mills who presents it bas, in the past, proved very funny describing the ldiocies of television, and televitapes for examples. Now he will providing a mass of fresh material. Like so many before them, comedian ambles around a set It would be so much better than

burbling "Smnshln', greet, studio". But where modesty and loovely". The studio addience, common sense have prevailed in common sense have prevailed in who are either on uppers or have the past, this lot have actually indulged themselves and done lt. warm-up man, react hysterically So now we get clips of embar-to every line. "Things went purr rassed and embarrassing moments backstage in which the "f" word is dutifully over-used pour épater les bourgeois.

Mills opens the show with the sort of object joke routine which Clive Anderson borrowed from the American chat shows, this week holding up what he said was Fergie's next wedding dress. with sponsors' logos all over the front and a mattress sewn to the sion conventions, using video- back. He chats briefly and superficially with a guest who usually have a stock of his own tapes has a connection with a recent news story (the woman who wants to use her late husband's the team making this pro- sperm, one of the protesters from gramme presumably said, during the tunnels beneath the site of a production meeting, "Honestly the new road) and then - in a if yon hrought a camera in here variety show tradition which goes straight back to the 1550s,

the band provides a musical interlude.

The new Wednesday edition of The Notional Lottery Live on BBC1 has the same sort of garish set, the same sort of audience, trained in the same American whooping technique, and, as guests, people who have won the lottery in the past and managed to avoid the subsequent pitfalls reported with such glee in the tablolds. The tone and atmosphere are, consequently, indistinguishable from those in all the other studio schlock shows. The presenter is former glamour model Carol Smillie and there are rather more musical interludes. Bafflingly the word "playing" is repeatedly used to describe participation in the lottery, though if you look at the glum people handing over their lottery money in newsagents every week you would no more

"playing" than you would that of the sad people in betting shops. Never Mind The Buzzcocks on BBC2, of all places, on Fridays is, again, studio bound, has, yet

again, the same fairground look, yet another howling andience, and a one-time stand-up comedian as presenter (Mark Lamarr). This, however, is a quiz show and a more entertaining example than some, the subject being pop music. Contestants are given part of a lyric and asked for the next line - what comes after "If young Nigel says he's happy"? or two memhers of the team have to sing the instrumental element of some past hit accurately enough for the third to identify it. You can sense an entire generation of air-guitar exponents playing along with this at home. As with presenter Angus Deayton in Have I Got News For You, the funniest lines tend to he those that have describe their activity as clearly been pre-scripted for

Lamarr, but the contestants are usually knowledgable and funny enough to keep their end up. The worst of the new series is

somewhat different. Fortean TV on Channel 4 is a television spin-off from a wonderful maga-zice called "Fortean Times" which calls itself "the journal of stranga phenomena" and reports, invariably sceptically, on everything from UFOs to weeping Madonnas. The television series, presented by a banjo player who, for reasons best known to himself, wears a hlack bomber jacket and a dog collar, appears to take everything seriously. From ghosts to sea monsters it reports as though these were as real as donble decker buses and bagpipes. Even when it turns out that the chief proselytiser of a Swedish lake monster is the head of the tourist board, this programme does not alter its tone of credulousness. It is all part of the current attitude in television that all things are equally plausible: the second law of thermodynamics and aromatherapy, universal satanic abuse and fox hunting.

Of course on terrestrial television there are also impressive those next time.

Dance

Steps of wounded romance

olly Jean Harvey is a desolate romantic, a bag of bones with a broken heart. She also has a spectral charisma, and that is the glory and misfortune of Dance Hall at Louse Point at the Queen Elizabeth Hall, a collaboration with the Mark Bruce Dance Company, based on her album with composer John Parish.

To the right stands the band in a cable tangle, and on the dance floor beside them, five dancers spin through the small hours. Only once does Polly move forward, but she watches the dancers with steely concentration and compassion, a Cassandra of their inevitable calamities.

"I remember everything" are her first words, and at once you know that she loves with terror and solemnity, gripping at grudge, clinging to desire. Her banshee wails and whispers cut through Parisb's eerie, thrashing soundscapes, but do not make for easy dancing. Although Bruce launched his company in 1994 with Love Sick, also set to Harvey's songs, here movement must compete with ber magnetic presence, and it is always a struggle to tear your eyes from her when she sings.

Bruce wittily picks up on some of Harvey's gestures - her flut-tering, splayed hand recurs as an image of butterfly flight and entrapment, tremhling down a lover's back, then clenching into armlock. The dancers echo the unexpected glee with which Harvey gulps at her torment: they lunge towards caress.
In this world, men are at once

groping scraphim and sadsack desperados, and Bruce's two blokes often mark time gurning on the sidelines. Women win the hest moves: Bruce knows that when it comes to reeling in hearts, the hips have it. Two women dancing together is the closest anyone comes to fun, practising their lush winding, fitting to each other's curves like snuggly snakes.

It is this whiff of time forgotten ambience that is the evening's strength. Joanne Fong has designed skimpy dresses in which to flirt the night away and wake next morning to find fan-

Compelling star with spectral charisma: Polly Jean Harvey

tasy crumpled in the pocket. The volnptuous Fong also leads the dance, propping up flesh on a slender foot, teasing and tormented with the saduction

Thankfully, the show is more obviously witty than the alhum. Where Harvey and Parisb's ver-sion of the Peggy Lee standard "Is that all there is?" had sounded like an intensive-cara waltz, here it captures a wry fatalism. Down comes a glitter-

ball, and Fong mooches over to Polly to share a boozy twirl of abandonment. They smile and twitch dismissive hands - the game of love and mischance may be a bad one, but it's the only one compelling star.

they know. Harvey's songs make a religion of wounded romance, and we are shown a forlorn trio of angels stretching their arms over a sweaty back-seat coupling. This is a rare interpretive gesture, and if Bruce's imagery were as bold

as his atmospherics, if he had been able to infiltrate Harvey's vengeful wraith into his choreograpby, Dance Hall would have been more than a showcase for a

of "marvellous designs, acting all over the place' was before my time as a professional critic, but after seeing the theatre's current main house production I now feel I have some little idea of that phenomenon. Its twin studio presentations. though, exhibit few disjunctions. lan McEwan's Conversation With

A Cupboord Mon is skilfully directed and designed by Jon Pope, adding a visual dimension heyond the simple re-enactment of the narrator's tale. As the Cupboard Man recounts the history of his warped personal develop ment - he was at first beld back hy a possessive mother, later forced to grow up at a dizzying pace when she effectively grew bored with him - and explains his infantilism and hunger for the safety of enclosure, actor Brendan Hooper negotiates a two-inch-deep pool of water, alternately avoiding it and immersing himself in it. Michael Lancaster's fine lighting provides further augmentation, as does an astounding act of God at one point: as the protagonist tells of being locked into a commercialsized oven, Hooper's wet hair begins gently to steam under the lights. He gives a strong, defiantly blunt performance, but the

phase a decade or so ago curious if sombre diversion.

strangely restricted tone. Mac-Donald's production is about class much more than sex: Jean the footman (Michael Albertson) is all uppity self-importance, parading a high opinion of himself which kitchen-maid Kristin has beard so often she can recite it with him. Andrea Hart's Miss Julia is every inch the condescending patriclan, engaging in cool verbal fencing with Jean but showing no deep emotion. Since the reversals of the play depend upon the protagonist's sexually generated journey to distraction, this approach effectively leaves much of the action unexplained; after 80 quite passionless minutes, Miss Julia goes to her death seemingly out of an incomprehensible sense of social obligation rather than in the depths of a primarily sexual despair.

Antony McDonald moves away from his primary field of opera to direct and design William Wycherley's The Country Wife in the main house. The curtain rises on Henry Ian Cusick as Horner, languishing in bed amid a huge

The Glasgow Citizens' show add up to little more than a be a cunuch in order to gain privileged access to a stream of soci-Upstairs, Robert David Mac- ety ladies) with inappropriate Donald directs his own transla-tion of what he has chosen to call and his fellow rakes gad about Strindherg's Miss Julio with a abstract geometric representations of 17th-century London clad in leather and Lycra and with a kind of polymorphously perverse lassitude.

The word "romp" is plainly not in McDonald's vocabulary, Characters move, with sometimes ludicrous gratuitousness, to dangling microphones in order to deliver their asides, and the sexual shenanigans contain all the bawdy comedy of an extended edition of Come Dancing. Mark Aiken as Pinchwife is coldly rather than hotly jealous of his innocent young bride; Amy Robbins as his sister appears to have been told that the play is the tragedy of Alithea's compromised bonour. Siobhan Stanley injects some sorely-needed vampish humour as Lady Fidget, but in general, when characters do find themselves in the same play. It is not one recognisable from the title. A few years ago the West End saw a musical adaptation of The Country Wife entitled Lust; McDonald seems to prefer

All shows run at the Citizens puce parallelogram, explaining Theatre, Glasgow until March 1

There is really no orches tral music by Brahms that could be called "unfamiliar"; he was too self-critical to publish anything that did not represent his best. That has not dampened the Barhican celebrations of the centenary of his death, which are drawing full bouses for familiar masterpieces. For chorus with orchestra, however, there are a few neglected pieces, and Sir Colin Davis has managed to them with all due tenderness. A include three of them in his Lon-

We heard two of them on Sunday, sandwiched between the Tragic Overture and the First Symphony. Both Nanie, op. 82 naenia, a funeral song - and the op. 54 Schicksolslied (Song of Fate) are serenely elevated pieces, one about the inescapable death of Beauty, and the other contrasting celestial beatitude with human turmoil. The poets

don Symphony programmes.

Concert

were respectively Schiller and Hölderlin. The London Symphony Chorus made a lovely, seamless sound, and Davis led week earlier they had performed the Gesang der Parzen, too. It was puzzling, though, that Davis had not found room for Rinaldo, the stern dramatic cantata op. 50;

that really is neglected. "Seamless" and "serene" were proper epithets for Davis's accounts of the overture and the symphony too. The dramatic junctures were measured and temperate, rarely sudden; he was more concerned to make the orchestra sing. From top to bottom, the orchestral textures permitted voices to rise out and be heard - and not only Roy Carter's oboe, which was a precious ornament in all the music. The balance was a continuous marvel: Davis's experience and the LSO's expertise combined to illu-

minate everything. One would not bave minded some sharper drama in the First Symphony, which was almost too seamless. It took Brahms years to complete, but be was a young man when he began it, whereas Sir Colin turns 70 this year. He gave us a long, judicious view of a turbulent work, not a dramatic re-enactment. But that had its own mature rewards.

The moral maze

The dilemmas of African conflict cannot be avoided by identifying one side as victims and the other as aggressors

The return of some 600,000 Hutu refugees to Rwanda in November gave the international community good reason to shelve an ill-thought out plan for military intervention in eastern Zaire. observers" who bad failed

lt suited many governments, especially the US administration, to accept the official Rwandan claim that the only Hutus remaining on Zairean soil were a hard core militiamen and soldiers loyal to the ousted regime - those who had carried out the 1994 genocide.

in fact, hundreds of thousands of Rwandans had fled deeper into Zaire, along with 150,000 refugees from Burundi and at least 300,000 displaced Zaireans. Most have since been wandering in the forest, out of reach of any relief effort, and are now in a desperate condi-

Ten days ago Ms Emma Bonino, the European humanitarian affairs commissioner, found some of them in a makeshift camp near Kisangani. Horrified by what she saw, she returned to Brussels fulminating against those, including the US government, that were attempting to play down the crisis.

Some relief agencies have gone further, accusing the US of a deliberate cover-up. Mr Nicholas Stockton, emer gencies director of Oxfam UK & Ireland, says that on November 20 he was shown US aerial photographs which "confirmed, in considerable detail, the existence of 500,000 people distributed in three major and numerous minor agglomerations". Yet three days later the US military claimed they had located only one significant cluster of people which could be identified as former members of the Rwandan armed forces and militias.

While Ms Bonino was in Zaire, Mr Stockton was telling a conference in Oxford that "as many as 400,000 ref-

persons have, in effect, been airhrushed from history". He blamed not only the US government but also "journalists and other seasoned

to expose the cover-up. At one level, the agencies are simply hitting back at the media which "dehunked their apocalyptic warnings", as Mr Stockton puts it, after refugees whom they had depicted as being at death's door poured back into Rwanda in November in

robust health. But in calling for an armed rescue mission the agencies found themssives alongside some strange allies: not only the French government and media but also President Mobutu Sese Seko of Zaire, who hoped such an intervention would help him regain control of his country. The Hutu militia leaders also hoped it would reverse the hlitzkrieg of Zairean rehels and Rwandan troops driving them

away from the froutier. Opposing intervention was virtually the whole the leading French newspa-esteblishment of the per these sympathies are English-speaking world from traditional right-wing non-interventionists. through many of the most respected Africa specialists among diplomats and jour-

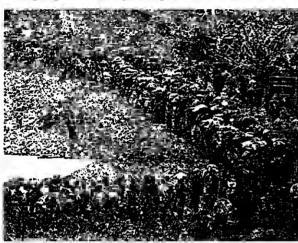

hers of Zairean displaced nalists, to human rights workers who are normally critical of western policies.

Why? The UK and US governments, along with most anglophone commentators on African affairs tend, with some good reasons, to approve of the present governments in Rwanda and President Yoweri Muse-

veni, hy far the most enlightened and effective ruler of Uganda since independence, has begun to pull his country round after the disastrous Amin-Obote era. And the Rwandan Patriotic Front - which succeeded in ousting a regime responsihle for genocide - did face a real threat of revenge from the militia which remained in control of the refugee

Similarly, it is hard not to sympathise with Mr Laurent Kahila, the Zairean rehel leadsr, in his campaign to overthrow the corrupt and despotic Mohutu

Yet in some francophone media, notahly Le Monde. per, these sympathies are transmogrified into a sinister Anglo-Saxon conspiracy. Indeed, Le Monde's correspondents seem still to regard Africa as a battleground hetween franco-

ugees and unknown num- November's return of refugees did not end the problem

phone and anglophone civil isations

Frustrated by the EU's failure to unite behind Ms Bonino's call for action, they accuse northern Europe of having a soft spot for "the authoritarian hut effective regimes in power in Rwanda and Uganda", and of going along with an American plot to "export instability" into both Sudan and Zaire - states they believe the US now wants to

see broken up. Relief workers should be worried when they find themssives echoing this kind of conspiracy theory and beating the drum for western military intervention in a complex and fastmoving African conflict. Most are aware that feed-

ing refugees is seldom a neutral act. It may discour age them from going home when they could safely do so; it may destabilise the local economy; it may (as it did with the Rwandan Huto militias and the Cambodian Khmer Rouge) help the authors of atrocities to re-form their troops for a new assault But to draw attention to

such dilemmas is not to solve them, and sympathy from some governments or parties does not entitle one to ignore evidence that their policies are causing largeacale suffering. Agencies which have as their raison d'être the relief of suffering cannot, or anyway should not, consider leaving children to starve or force refugees home against their will as acceptable policy options. Mr Stockton has a point: if it is wrong to treat all sides in a conflict as equally guilty, it is no less wrong to

as victims and everyone on the other as aggressors or mass-murderers. When hundreds of thonsands of men. women and children are driven into the forest at gunpoint and left to starve, such justice is

Germany on the wrong path to Maastricht

From Mr Brian Reading. Sir. Samuel Brittan's instinct tells him that Germany will meet the Maastricht budget deficit criterion in 1997 ("Pitfalls on the euro road", Fehruary 10). But his chart demonstrates that Germany will fail the Maastricht public sector debt criterion. This requires that the ratio of public sector debt to gross domestic product should not exceed 60 per cent "unless the ratio is

value at a satisfactory pace". The Organisation for Economic Co-operation and Development estimates that Germany's debt ratio on

Maastricht definitions was 6L3 per cent of GDP in 1996 and forecasts this will rise to 63.2 per cent in 1997 followed by 64 per cent in 1998 (OECD Economic Outlook December 1996). Moreover, it will then have risen every year since 1991. Far from diminishing and approaching the reference value at a satisfactory rate, it is increasing beyond the reference value and at an accelerating rate. It is easy to see why. A

sufficiently diminishing and approaching the reference

budget deficit of 2.9 per cent of GDP, which is probably the best Germany can hope for in 1997, increases debts by 4.7 per cent (2.9 times 100 divided by 61.3). So unless nominal GDP grows by 4.7

per cent or more, the debt to GDP ratio rises. The OECD forecasts only 3.4 per cent nominal GDP growth this year (2.2 per cent real), which is on the generous side. So if the German gov-

ernment adopts as rigid an interpretation of the 60 per cent deht criterion as Samuel Brittan suggests it is adopting with regard the 3 per cent deficit criteria, it will need to cut its hudget deficit to below 2 per cent of GDP in order that its debt ratio shrinks. But then nominal GDP growth would slow to less than 3.4 per cant. making an even bigger deficit cut necessary to meet the debt criteria. Only further

draconian deficit cuts. accompanied by substantial monetary easing, sufficient to push the D-Mark even lower, thereby boosting growth, inflation and nominal GDP, can square Germany's vicious deficit/debt circle. This won't be forthcoming.

Germany cannot adopt a rigid interpretation of all Maastricht criteria without ruling itself out. Selective rigidity is simple hypocrisy. But then the criteria are economic nonsense anyway.

> > Thailand is not Mexico. There are some important similarities between Thailand's economic problems and those which Mexico faced in 1994; notably, a ballooning current account deficit rising levels of short-term foreign debt and a highly fragile banking system. But the combination is not yet as explosive as it was in pre-crisis Mexico.

That Thailand has still been

paying a price for its apparent vulnerability - in the form of a sharp decline in foreign capital inflows and sharply higher interest rates - ought to reassure those who fear that Mexican-style crises are bound to to recur. In effect, the International Monetary Fund, tha international credit agencies and others sounded the alarm about Thailand last autumn with murmurings about the health of the financial system and the size of the trade gap. And rather than delay an adjustment the government has been forced to act.

First strike Yesterday's statement by Mr

Ivan Rybkin, secretary of the Russian Security Council, that Moscow should be ready to use its nuclear weapons against a conventional military attack, is worrying. He is proposing a reversal of Mr Mikhail Gorbachev's policy of "no first strike", at a time when Russia cannot be considered to be under any military threat. In fact, it is an indication of two different but disturbing developments. In the first place, it is confir-

(a)

mation of the confusion over vital policy issnes emerging from the Kremlin. Mr Rybkin was fairly rapidly slapped down hy President Boris Yeltsin's spokesman, but be simply popped up and confirmed his statement

Such insubordination comes only days after General Igor Rodionov, the minister of defence, complained that he was unable to get near the Russian president to discuss urgently needed military reforms. And he confirmed what Mr Rybkin's statement implies: that Russia's conventional forces are now in such a parlous state, they could not resist any conventional attack. Since their defeat in Chechnya, they bave suffered spontaneous disintegration. Whole units are reported to be deserting.

It is against that background Nato enlargement must be con-

bear, severely weakened and lacking direction. Expansion of the Nato alliance to include the emerging democracies of central and eastern Europe is seen by all sides as further humiliation. Russian resentment of tha move should not be underestimated. It is not that Nato enlarge-

ment is a military threat in itself. The allies have already promised that no nuclear weap ons would be stationed in the new member states. They would be prepared to give assurances on conventional forces, too. The Russian army has far more important things to worry about than Nato, in particular reforming itself and downsizing drastically. Gen Rodionov and Mr Alexander Lehed, his former colleague and would-be president, know that perfectly well.

Rather, the threat of Nato enlargement to Russia is psychological. That is very difficult for the western allies to respond to, but they must try. To abandon enlargement now would be seen as a betrayal of the new applicants. But the member states must make it clear that their expanded alliance is a different animal from the one which confronted the old Russian bear. It should not be focused on a Russian threat, whatever Mr Rybkin may say, but should be dedicated to presthat the current debate over erving stability across the conti-

Yesterday's budget announce-

The same cannot be said of

the current account deficit,

which, for all Mr Viravan's

efforts, is unlikely to be much

below 7% per cent of GDP in

1997. But investor worries about

the country's continued reliance

on expensive foreign inflows

will be somewhat eased by the

second message of yesterday.

This is that, even within a

potentially unruly coalition a

government minister can prom-

ise tough measures and deliver.

van can claim to be doing every

thing in his power to keep the

short-term macro-economic situ-

ation under control. Long-term

stability will be be more diffi-

cult. The economy has to find

ways to work through the mess

caused by the property sector

collapse and to revive domestic

exports. Neither will happen

without the private sector show

ing the same commitment to

change as Mr Viravan. Nor will

it happen overnight.

With the new budget Mr Vira-

ment sends two important sig-

nals to worried investors. The

scrape into balance.

ing the progress achieved.

The opportunities offered by

negotiations.

South of the border, the early repayment by the government of President Ernesto Zedillo was greeted with a burst of optimism. The past was being laid to rest and Mexico had a future to look forward to again.

"For the first time ever, our macro-economic projections are more optimistic than those of the government," says Mr Mauricio Gonzalez, a partner with GEA consultants in Mexico City. 'Almost every aspect of the ecooomy will improve this year."

Mr González believes economic growth will accelerate after its estimated 4.5 per cent recovery in 1996; aunual inflation will fall from 27.7 per cent in 1996 to around 17.5 per cent by the end of 1997. The strengthening economy will create 800,000 new jobs this year - less than the 1.2m jobs Mexico needs to accommodate new entrants to the labour market every year, but a big improvement over the two barren years since the peso devaluation.

But the country which is emerging after two years of shock therapy and a crippling recession is very different from the Mexico that joined the North American Free Trade Area in January 1994. The triumphalism which accompanied accession to Nafta, and the presumption of an equal partnership with Canada and the US, bave vanished along with the jars of American peanut butter on supermarket shelves and the cheap flights to Miami.

Trade between Mexico and the US has soared to an estimated \$150hn a year. But that is because the devaluation of the peso transformed Mexico into a cheap source of manufactured goods, with industrial wages ooetenth of those in the US.

Hunger for foreign capital is also stripping the country of the last vestiges of protectionism. Foreign banks, barred from taking part in the privatisation of they bave swarmed over the debilitated financial system and under \$2bn.

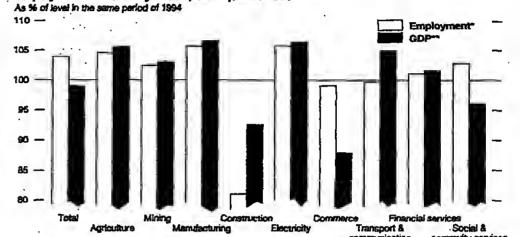

lates, foreign investment is not far behind. AT&T and MCI are driving competition in the recently opened long-distance telecommunications market; forbuilding power plants and gas pipelines. Foreign investors would also

Where the government deregu-

have bid for Mexico's 61 petrochemical plants bad the government not backtracked on its decision to privatise the industry. Still, private contractors are expected to play an increasing role in the state oil sector, particularly in developing the Burgos gas field in northern Mexico. Elsewhere in the economy, the

peso crisis has forced a marked shift in the patterns of ownership and control.

"Three years ago, foreigners came bumbly to Mexico, content to be the minority partner in a Mexican venture," says Mr Rogelio Ramírez de la O, director of Ecanal economic consultants in Mexico City. "Today, they want

full control." Investment-starved Mexican ties today, compared with 15,000 Mexico's commercial banks five companies are increasingly companies three years ago. saviours. Since the devaluation ners" - the standard euphanism for selling out to a multinational. Last November, for example, Bell taken control of one-fifth of Atlantic of the US took over lusa-Mexico's banking assets for just cell, a poorly-managed cellular telephone company, while Archer Daniels Midland took a 22 per cent stake in Maseca, the Mexi-

can tortilla maker.

Each investment has brought hundreds of millions of dollars into the country, making Mexico eign companies will shortly begin a more open economy today than at any time in its history. Such opennass, however,

makes the country vulnerable to external shocks. "A rise in US interest rates, or a prolonged fall in US stock prices, could wipe out much of the optimism which is sustaining the Mexican economy today," warns Mr González The most dramatic change has

taken place in Mexico's external sector. Exports have doubled in less than five years to \$95.9bn pesos in 1996. Most of this growth has taken

place since the peso devaluation, as manufacturers sought foreign huyers for goods they could no longer sell at home. Bancomext the government's export promotion bank, estimates there are 31.000 Mexican companies directly involved in export activi-

has been driven by the export sector," Mr González says. "Unfortunately, this recovery has been very uneven." The peso crisis accentuated the

divide between Mexico's modern, export-oriented economy, which now accounts for almost 30 per cent of national output, and the deeply depressed local economy, which plummeted by 15 per cent during the 1995 recession and only recovered an estimated 1 per cent of lost output in 1996. Mr González, like most Mexi-

can economists, worries about the poor linkages between the dynamic export sector and a backward local economy which makes Mexico vulnerable in two ways: "Our economy has only a limited ability to substitute imports," he explains. "Export industries are over-de-

pendent on imported inputs, while imports of consumer goods tend to surge as soon as there is a modest recovery in real incomes." Last year's incipient economic recovery produced a 23.6 per cent surge in Mexico's

import bill. "We have a problem," says Mr Guillermo Ortiz, finance minister, "in that our small and medium-sized companies are plagued by bad management and low pro-

ductivity." Mr Ortiz believes technical sistance provided by state development banks, universities and business councils will begin to remedy these shortcomings. "Our aim is to develop a strong nucieus of small businesses which are integrated into bigger

production chains."

The government, through Bancomext, is trying to persuade large exporters to increase local sourcing, particularly within the maguiladora (in-bond) industry on the US border, which draws less than 3 per cent of its inputs from within Mexico. Mr Enrique Vilatela, Bancomext's managing director, says he is combing the country "town by town" to identify companies which can be incorporated into Mexico's export

However, Mr Vilatela is unlikely to find many candidates in Chiapas, Oaxaca or Guerrero, southern states which have been country races to integrate itself with the US. The gap between Mexico's industrial north and

more backward south has widened with the concentration of resources in the dollar economy.

According to a study by the Technological Institute of Monterrey, average labour wages in the northern state of Nuevo León are three times the level in Chiapas. a state which borders Guatemala. Per capita consumption in Baja California, another northern state, is five times higher than in Oaxaca, 3,000km further

Life expectancy is 20 years higher in northern Mexico than it is in the south. One-quarter of the population is illiterate in southern Mexico, compared with ss than 6 per cent of the population on the US border. Not surprisingly, the two guerrilla uprisings that bave shaken Mexico since 1994 have appeared in Chia-

pas and Guerrero.
"We must avoid the geographic polarisation of the country," says Mr Ortiz, who places great store by the development of the south's natural resources, particularly in oil, timber and hydro-

ven within regions inequalities are growing: real incomes have lost one-fifth of their purchasiug power since the devaluation, while more than 50 per cent of urban families subsist on less than two minimum wages - 52 pesos, or \$6.50, a day in total. A national bealth service surgeon earns little more than \$300 a month. Only the very rich, with doliar accounts in Caribbean tax bavens, have been able to withstand the double blow of rapid peso depreciation and high inflation.

The squeeze on incomes is unlikely to lead to a surge in wage demands - Mexico's labour movement is too subservient to protest. But it is fuelling a smouldering popular anger which some economists fear could explode without warning. "Despite all the government debt relief schemes introduced since the crisis," says Mr Ramírez de la O of Ecanal economic consultants, "many Mexican families have lost their savings, their cars, and may well

lose their homes". Bank lawyers confirm this predicament the number of repos-session actions bas risen 100-fold to an estimated 400,000 lawsuits since the start of the crisis. For tunately for lapsed mortgaga debtors, law enforcement Mexico is both slow and inefficient. The threat of eviction, however, has done little to alleviate the anxiety most Mexicans still harbour about their eco-

nomic future.

There is still a big disparity between the optimism of the government's economic pronouncements and the everyday struggle of Mexican families to make ends meet," says Mr Gonzalez. Ha believes it will be a long time before Mexicans begin to feel an improvement in their personal finances, as wage restraint will continue to play a key role in keeping inflation in check. Mr Ortiz promises the recovery

will broaden this year, and that the benefits of a healthier economy will be spread more evenly. The challenge, be says, is to lay the foundations for much higher, sustainable growth rates in 1998 left behind as the rest of the and beyond. By then, be hopes the peso debacle will be only a bad memory, from which a few useful lessons were drawn.

### OBSERVER own man", Wall Street has lost country's plum corporate post.

## Dow Jones wall of steel

A trio of well-known chairmen has been put up for election to the board of Dow Jones, owner of the US's daily business bible, the Wall Street Journal But if they imagina this will assure a degree of special consideration for them or their companies in the WSJ, they should think again. Of the three, only William Steere of Prizer has enjoyed a

smooth ride through its financial pages: by general consent, Pfizer has been the outstanding performer among US pharmaceuticals companies in the 1990s, and is now pushing for

a place among the country's 10 most valuable corporations. The others - Harvey Golub of American Express and Frank Newman of Bankers Trust - are

both turnround artists who still find hig question marks hanging over the futures of their respective companies. Both are also frequently talked of on Wall Street as takeover bait Nor will a seat on the Dow

Jones board necessarily help their public profiles. Rand Araskog another Dow Jones director and the chairman of ITT, has just been hit by a hostile bid from Hilton. The Journal's werdich was that while Araskog "has always been his."

faith in his management. Another Dow Jones director to have found little comfort in the Journal's columns is Carlos Salinas de Gortari, the former Mexican president His arrival on the Dow Jones board in 1994 seemed to put the finishing ... touch to a glittering international reputation. But just months later a devaluation and business scandal drove the former president into exile. .

.. Since then, he will have read much in the WSJ about the affairs of his brother, Raul, who currently resides in a Mexican prison Salinas is not standing for re-election to the Dow Jones board in April.

Spanish sparkler ■ Since the centre right came to

power nine months ago in Spain. successful applicants for top jobs have either had to be stockbrokers, merchant bankers or top businessmen. If they were close friends of José Maria Aznar, the prime minister (as is Telefonica supremo Juan Villalonga), or of economy. minister Rodrigo Rato (as is Alfonso Cortina, chairman of the energy groop Repsel), then so much the better.

So the appointment of Rodolfo Martin Villa to head Endesa; the government-controlled electricity group and the

comes as a bit of a shock. A singular survivor of

Franco'a political bureaucracy be ran the dictatorship's student union in the 1950s - Martin Villa is every Spaniard's idea of a political patriarch. As interior minister in the 1970s, he was busy steering Spain's transition to democracy when Aznar and his buddies were barely out of school. Nobody would cast him as a slick financier bristling with ideas about regulatory issues and privatisation procedures. Local wags say that by handing Endesa to Martin Villa.

Aznar has, for once, put political expediency ahead of management expertise. The veteran politician was the only figure left in the governing Popular party with sufficient gravitas publicly to challenge Aynar on policies that seriously trouble diebard Spanish conservatives. Solution? Persuade him to get out of polifics - Martin Villa gives up being an MP - by making an offer difficult to refuse.

Enough's enough If only other US companies would pay heed to Gerald Levin,

boss of Time Warner Corporate America is in the grip of a frenzy of mergers and demergers of historical magnitude: indeed, Time Warner audience for three years.

is itself the result of one of the biggest mergers of the lot, and has only just absorbed Ted Turner's entertainment group. Yesterday, though, Levin called a halt to the wheeling and dealing. "Time Warner is now

strategically complete", he said. There are still plenty of people who think the company is a work in progress; Wall Street expects it to shed its cable TV systems to get out from beneath a mountain of debt.

But, for the sake of sanity - if not to thin the wallets of a few lawyers – maybe Levin's words should become the new rallying cry for corporate America.

### Playing away Judging by his performance

in London yesterday, Peru's President Alberto Fuimori is one of the world's most loguacious and accessible heads of state. It's different back home, where

he's renowned for a hermit-like inscrutability. Peruvian journalists have long complained that he keeps his most important announcements for outside the country, while domestic scoops are reserved for the chicus, a gaggia of uncritical female TV reporters who accompany Fujimori on all his ... trips. Lima's foreign backs haven't been granted an

### Ginancial Times 100 years ago

### A Mountain Of Asbestos At the end of last October we

published an article dealing with a 'mountain of asbestos' at Danville, midway between Montreal and Quebec, which was of unique formation, inasmuch as the fibre, instead of being found only in the usual form of layers, permeated the whole hill, and even what used to be regarded as dross was available for the production of a valuable commercial product called "asbestic." in which the shorter fibres are utilised. We appounced that it was proposed to form a company to work this extraordinary property. The public ought to derive a considerable benefit from this new enterprise owing to the inevitable cheapening which it will effect.

### 50 years ago Happy Switzerland

There can be little doubt that. from an economic point of view. Switzerland is to-day the happiest country in Europe. She actually has to defend herself against the flood of unwanted wealth thrust upon her. Her gold and foreign exchange reserve has nearly doubled since 1938. Viewed from London, the U.S. dollar is a "hard" and "scarce" currency. Viewed from Switzerland, lt.is anything but hard and scarce.

## Thai cabinet approves UN agency budget cuts of \$2bn

By William Barnes in Bangkok

Mr Amnuay Viravan, Thailand's finance minister, yesterday won cabinet approval for \$2bn in budget cuts over the next two years in a bid to reverse the country's worst economic performance in a

He slasbed infrastructure spending in an effort to maintain the country's traditionally balanced budget and dispel worries that the country's economic elowdown could force a devaluation of the baht.

"My credibility is at stake. I know I can cut it [the budget] and you'd better believe it," Mr Amnuay said, as be announced detalls of cuts totalling about 6 per cent of the national budget.

Previous announcements of planned spending cuts have failed to calm Thailand's jlttery financial markets, as eyecatching plans to chop politi-cally sensitive military purchases appeared aimed mostly at already defunct schemes. Yesterday, the finance minis- nomic growth this year to 6.8

Infrastructure spending slashed in bid to halt economic decline

ter cut defence expenditures by 4.1 per cent

He also axed spending at two of Thailand's most politically important and lucrative ministries. The interior ministry's budget was cut by Bt9.4bn (\$362.3m), or 5.1 per cent, while the communications and transport ministry's budget will be reduced by 6.6 per cent.

State enterprises, not part of the government budget but of some three years in the conseen to contribute to Thailand's high current account deficit and level of foreign debt, will be expected to cut their expenditures by Bt62.3bn. "It is not politically popular but we have to do it even if we may lose a few votes along the

way," Mr Amnuay said. Thailand'e central bank said the budget cuts bad caused it to reduce its forecast for eco-

### funding withheld by US and per cent from 7.1 per cent. But this lower level is considered **Britain** The central bank said the current account deficit should fall to 7.4 per cent of gross

THE LEX COLUMN

## Pulling the Levers

Unilever's decision to make a £5bn exit from its speciality chemicals business says much about the confidence of naw joint chairman Mr Niall FitzGerald. Chemicals has been the sprightliest element of the portfolio in recent years, and was supposedly key for product development. But chemicals and consumer goods require distinct management skills. The old style Unilever-knowsbest approach could have resulted in speciality chemicals getting left behind as the industry consolidates. But the new hard-nosed Unilever is all about focus. It hopes to profit from this consolidation by selling, and profit again from concentrating on its core business.

Investors reacted favourably, but they should not get carried away by the rbetoric. The disposals will leave Unilever with around £3bn of net casb and £10bn of potential spending power. The group will want to buy consumer goods businesses where it can accelerate sales in emerging markets – so Reckitt & Colman, CPC or Heinz look logical targets, Nonetheless, Mr FitzGerald needs to deliver better returns from acquisitions than be got from chemicals, and that is an enormous challenge.

At least last year's pick-up in profits buys more time. And the rewards for improving performance could be enormous. Procter & Gamble is a more obvious comparison than the UK food sector, and it trades at a 20 per cent higher multiple of enterprise value to operating free cashflow. Mr FltzGerald has thrown down the gauntlet; he is a very long way from winning the

### UK profits

5 A 5 &

A new high for sterling, another low for Britain's exporters. Since the start of 1996, the pound has gained 17 per ceut on a tradeweighted basis and 25 per cent against the D-Mark. With two fifths of UK profits coming from abroad, that has knocked back estimates for 1997's earnings growth by around 2 percentage points to 9 per cent. Not surprisingly, the FTSE All-Sbare has lagged behind most continental bourses this year, despite Britain's rosier economic prospects.

There may be worse to come. Most analysts' bottom-up forecasts see sterling weakening later in 1997. If it simply holds current levels, profit forecasts will have to be cut again. Brokers have also been slow to adjust estimates for second-line

FTSE Eurotrack 200: 2163.3 (+7.1) Reuters Holdings Share price relative to the FTSE All-Share lodge

stocks, particularly where the effect has been more than merely translation of overseas profits. Shares in electronics group Eurotherm fell 2 per cent yesterday when it warned that its exports to continantal

Europe were suffering.

For investors this is a dilemma. Sterling'e etrength leavee large swathes of the UK market looking unattractive, just as previous favourites, such as general retailers, have hit a rocky patch. Currency risk, added to racy valuations in the US and poor fundamentals in Japan, means the biggest overseas markets are also unpalatable. As a result, excess liquidity has rusbed into those domestic sectors where pleasant earnings surprises are still possible – largely financials and construction. While sterling remains strong, that trend is likely to persist.

### Reuters

Reuters' downbeat statement yesterday was largely due to foreign exchange. Its reported results are likely to be dragged down because overseas profits will be worth less in sterling. Investors should not be too concerned about that; the effect will be largely confined to 1997. More worrying, for a growth stock, is that revenue rose only 6 per cent on an underlying basis in the final quarter of 1996. Low volatility in forex markets, beavy users of Reuters' products, has cut demand.

Elsewhere, the outlook is reasonable. Orders for Reuters' new 3000 information system have got off to a good start and should contribute meaningfully to profits from next year. And Instinct, the group's electronic stockbroker, continues Its free.

rapid expansion. An end to the bull market would, of course, hit Reuters. Investment banks would react by making traders redundant and disconnecting their terminals. Moreover, Reuters still suffers from a poverty of ambition and an embarrassment of riches. It ought to be well placed for the new era of electronic information. But its forays ontside its financial markets stronghold have been cautious to a fault. As a result, it is adding to its £1bn cash pile at the rate of £200m a

in talks

That said, after the recent slide the stock is no longer expensive. Indeed, at 20 times this year's earnings and nine times earnings before interest tax and depreciation, the shares may even be a little cheap.

### Football

Football fans in England are livid that tonight's game against Italy is being shown live only on pay-TV. Critics in the UK claim the audience would be six times as large if shown free on terrestrial TV. It is all highly ironic. The popularity of the match has much to do with the numerous Italian stars adding some sparkle to the UK's Premier League. But the only reason clnbs can afford these players in the first place is because of the huge cash infusion satellite TV has brought

into the game. The simple fact is that the rude health of Premier League clubs has everything to do with the influence of non-terrestrial TV. In 1983/4, the BBC/ITV terrestrial dnopoly paid the football league £2.6m for television rights. In the coming four seasons, however, the Premier League will receive an average £173m a year from TV rights, with £155m of that coming from BSkyB, the satel-

lite provider. There was a case for the government guaranteeing wider access to showcase events such as the FA Cup and Wimbledon. Beyond this, sports authorities should be allowed to judge for themselves how to balance commercial considerations with the need to maximise exposure for the sports they administer. If they are greedy, they will devalue their own product in the long run. Certainly, there is no role for the European Commission which thinks it should have a voice in these matters. EU citizens are no more entitled to watch blg sports events for free than they are to watch Pavarotti or Madonna for

### IN BRIEF

### Sony in talks with UK label

Sony Music is negotiating a multi-million pound deal with Independiente, a new UK record label launched by Mr Andy Macdonald, who signed Paul Weller, Portishead and the Beautiful South. Mr Macdonald, who flew to New York yesterday for a meeting at Sony Music's corporate headquarters, set up Independiente last autumn after clashing with PolyGram, the Dutch entertainment group, over its plans to take control of Go! Discs, his old record label.

Computer groups' shares soar Shares in Dassault Systèmes soared after the French specialist in computer-alded design and manufacturing reported a 55 per cent advance in net profits from FFr221.8m in 1995 to FFr342.5m (\$61.3m) in 1996. Meanwhile Cap Gemini, the European computer software and services group, reported a more than five-fold improvement in annual profits, spurred by a surga in business linked to new technologies such as electronic commerce and the Internet. Page 16

Japanese securities commissions cut A stream of foreign and Japanese securities companies have halved their trading commissions for over-the-counter shares in the past 10 days in response to a similar move in late January by Matsui Securities. The Matsui decision prompted a mini-revolution in the country's hitherto moribund OTC market. Page 17

# Timmer quits as Philips director

### Ex-president leaves board four months after handover

By Gordon Cramb In Amsterdam

Mr Jan Timmer, who led Philips from near bankruptcy five years ago, yesterday quit the Dutch electronics group less than four months after handing over to Mr Cor Boonstra, its tough new president.

Philips' supervisory board. to which Mr Timmer was elevated last October, said it regrets this decision, but respects the personal considerations which have led to his departure". The company refused to elaborate on these reasons, but an official said it was not thought Mr Timmer was relinquishing other similar posts such as those at Royal Dutch/Shell.

Since he took office, Mr Boonstra has spent much time undoing the diversification strategy of his predecessor. has bluntly called the "bleed-

a squeeze on profit margins on television sets and other consumer products, as well as in its semiconductor division. Mr Timmer brought Mr

Boonstra in as vice-president two-and-a-half years ago and That has come in an effort to designated the former execu-ehed non-performing parts of tive of the Sara Lee foods tive of the Sara Lee foods the Philips empire, or what he group as his successor - the group's first outside president. tures scattered among the ers". unease between the two as one pet Timmer project after the other was felled. Last month. the new chief described the structure of the organisation he had inherited as "like a plate of spaghetti".

A team from McKinsey, the management consultants, is scrutinising numerous venconsumer audio-visual he is shutting Super Club, a operations and at its Eindhoven headquarters, analysts expect further large write-offs when the group unveils its 1996 results tomorrow.

Mr Boonstra's moves include beralding the end for Philips' technology in making liquid crystal displays used in laptop computers, putting the business into a joint venture with

chain selling video cassettes, compact discs and computer games. The plug was also pulled on a planned cable TV alliance for the Duich market.

A separate cable venture in which Philips was a minority participant ended in further indignity for Mr Timmer in December when it was taken off the air after only four

margins and over-optimistic investor expectations. Mr Lars Ramqvist, chief executive, said Ericsson was capturing market share in the mohile handset market from its two key rivals, Motorola of the US and Nokia of Finland.

increase.

Shares in Nokia, which publishes full-year profits tomorrow, were at FM322 (\$65), down FM0.50, in Helsinki. Ericsson, which says it is the world's biggest supplier of telecoms equipment, said order hookings both for mobile phones and mobile systems rose almost 50 per cent in 1996.

Price pressure from competitors had been strong, but not as fierce as expected. "It is still something of a seller's mar-ket," Mr Ramqvist said. Nevertheless, price competition was the prime factor behind an erosion of the gross margin, from 43.6 per cent in the fourth quarter last year to

said margins were unchanged so far in 1997. Operating margins rose from 8.3 per cent to 8.7 per cent over the year because of a decline

40.9 per cent. Mr Ramqvist

in the company's big research and development budget as a "What has amazed me is how long Ericsson has been

able to hold margins where they are. Market conditions will get tougher, but there is still huge room for cost-cutting on the production side," said one London-based telecoms

Fourth-quarter sales from mobile operations rose from SKr19hn to SKr29.4bn, underlining the segment's continued Lex, Page 12 ability to deliver growth.

# boosts sterling

By Edward Luce

A leading US institution yesterday launched the first global bond to be denominated in sterling, boosting the currency's reputation as a "safe

Investors said the choice by Fannie Mae, the US Federal National Mortgage Association, reflected sterling's growing strength against other
European currencies.
Sterling has appreciated by
The Fannia Mae bond will yield 10 basis points (a basis

15 per cent against its tradi partners on a trade-weighted basis since August. The bond, to be priced today, is managed by BZW and Merrill Lynch. "This is a significant devel-

opment which reflects the fact that sterling is now stronger than most other European currencies," said Mr Nicholas Medd, director, syndicate, at HSBC Markets. "It also reflects the fact that gilts [UK government honds] are now the highest yielding

bonds in the G7 group of coun-Like a eurobond, a global

bond is priced against the benchmark government bond of the currency in which it is issued - usually US dollars but also yen and D-Marks. Bnt unlike eurobonds, which are confined to Europe, global bonds are issued simultaneously in the US, Asia and

point is a hu centage point) above 7 per cent UK government gilts and will mature in June 2002. Fannie Mae has previously issued D-Mark and yen-denominated global bonds.

Sterling has recently attracted several issues, with £7bn issued in eurosterling bonds in January alone. This compares with £30bn in 1996 and £18bn in 1995 as a whole.

Capital Markets, Page 22 group to better the underlying efits. Revenues from informa-

## Fannie Mae bond Reuters says pound's strength may hit trading tion products rose 3 per cent to

By Christopher Price

Coocerns over the strength of sterling and the introduction of new products prompted Reuters to issue a cautious outlook on trading with its annual results yesterday. The guarded statement

helped depress shares in the financial information and media group by 16p to 626p. Reuters said its Globex futures trading system was likely to close in 1998 following the ticipants to pull out.

Group pre-tax profits rose 17 per cent in 1996 to £701m (\$1.1bn) on revenue 8 per cent higher at £2.91bn. The growth was driven mainly by the continuing strong demand for Reuters' Instinet agency dealing business and other transaction products.

However, Mr Peter Job, chief executive, warned that it halted after the UK govern-would be "difficult for the ment scrapped related tax ben-

revenue growth rate" in 1997. £1.89bn. Mr Rowley said a dull This was because the company was attempting to increase the installation rate for the new 3000 series of dealing and information products.

The company, which derives 85 per cent of revenues from overseas, warned about the adverse effect of the continuing high level of sterling. Using year-end exchange

rates, not an annual average, Renters' operating profits would have been reduced by £100m to £541m (cor with £551m in 1995), and revenne by £230m.

The group's cash plie stood et £1.05bn at the year-end. Mr Robert Rowley, finance director, said options for returning some of the cash to shareholders were being examined. The company's plan last year to give investors £613m via special dividend shares was

foreign exchange market had been the chief cause of the largely flat performance. Transaction products increased by 21 per cent to

£812m, with Instinct revenues rising by 43 per cept. Reuters said the closure of Globex, which made a marginal contribution to group sales, would not have an impact on the group's results. Mr Rowley said sales of the

3000 series, launched six months ago as a more sophisticated version of the 2000 range, were "reasonable" at 14,700. However, only 2,500 had been installed. There are 200,000 Reuters 2000 terminal users who will be upgraded to the 3000 system.

Capital expenditure of £372m would probably be matched this year, with the 3000 roll-out taking a large proportion.

## Trouble for trackers as median beats average

those £1m-ayear prima donnas, at last managed to hit back at their tormantors, the

passive indextrackers? At the turn of the year, word got around that the trackers - a hunch, hy all accounts, of unglamorous low-paid nerds - had finally been consigned to the bottom of the performance league table, at any rate in the UK stock mar-

Certainly the trackers had heen watching the market trends anxiously through 1996. Usually the active fund managers as a group under-per-form the All-Share Index, typically by 30 basis points (0.3 per cent) a year. This margin roughly reflects the costs of active management, and its persistence is a triumph for the much-derided efficient

markets hypothesis. By June, though, the WM Universe was beating the All-Share Index total return by 70 basis points. Outperformance by smaller

companies, benefiting some of the more aggressive pension fund managers, was an important factor. And according to Barclays

Global Investors, the market leader in passive management, the impact of big new issues such as Orange and Railtrack was also significant. This was because they out-

performed in the intervals between flotation and inclu-

result of good judgment or simply the inverse of some underperformance hy foreign investors (who now hold about 16 per cent of the UK equity market) is hard to say. For instance, UK pension funds hold a disproportionate amount of Shell Transport, whereae US pension funds hold Royal Dutch instead. At any rate, to the trackers'

The active manager's ability to hedge currencies can give a useful advantage denied to the completely passive

manager

greet relief, much of the

January-June outperformance was reversed later in the year, in particular because of relative smallcap weakness. With about 40 per cent of the calendar year results in, WM is showing a weighted average return on UK equities of 16.7 per cent, against the All-Share

return of 16.8 per cent. That is not the whole story. however. The WM median fund return is up at 17.7 per cent and the rival Caps measurement service is showing a matched the index return, not median of 17.8 per cent. It looks as though the smaller, more nimble funds did well in 1996 but the big funds lagged -

be indexed? It does not appear to have Another reason, however, been a very good year for their side, and prima donnas appears to have been stock global indexers either. WM's can have a short shelf-life.

Have the active selection among the blue universe of tax exempt US clifund managers, chips. Whether this was the ent funds benchmarked to the MSCI EAFE (basically, world excluding north America) Index outperformed dramatic ally in 1996. The median fund beat the index return of 6.4 per cent, in dollars, hy as much as

600 basis points. Underweighting Japan, and especially Japanese banks, has been an easy route to success for the global active managers Otherwise they did well in the Netherlands, Hong Kong and Sweden, where they tended to be overweight.

No wonder the global indexers have often turned to either active or consensus country asset allocation in order to reduce their risks against the active peer group.

Quite apart from stock market judgments, the active manager's ability to hedge currencies - notably, in 1996, the yen - can give a useful advantage denied to the completely passive manager.

Coming back to the British pension funds, they also appear to have done well in Asia and Europe, sufficiently so to offset the mistake of drastically underweighting US equities. Their overseas return was about 3 per cent against 2.6 per cent on the World ex UK Index in sterling. In the US, their shrunken portfolios a bad out-turn given that they had underperformed (on average by 110 basis points annually) in nine out of the 10 pre-

vious years. though surely not because they are the ones that tend to But the index-trackers can certainly survive a poor year. The law of averages is still on

### **OPENING DOORS** to opportunity

Over the past twelve months CVC has made new investments in thirteen buy-outs totalling close to £1 billion and participated in cleven realisations totalling in excess of £1 billion.

No wonder KPMG heve confirmed CVC as Europe's leading buy-out house\*

If you are a manager who may have the opportunity to become an owner, an adviser to management, or a potential vendor, you should talk to CVC first...our door is always open.

# Foreign sales help Schering jump 46%

By Frederick Stüdemann in Berlin

Schering, the German pharmaceuticals company, yesterday reported a sharp rise in profits and turnover in 1996, helped by continuing sales growth outside Germany and the effects of the rise in

Pre-tax profits rose 46 per cent to DM362m (\$219.4m); with extraordinary items and exchange rate of DM60m. The company said that influences taken out, they rose 25 per cent. Sales rose 13 per cent its foreign subsidiaries, which to DM5.27bm.

Analysts said the figures were ahead of forecasts and pointed to a in previous years. strong rise in operating profits in

month stage, Schering'e 1996 operating margins were 12.5 per cent, compared with the 1995 figure of

13 per cent. Profits were boosted by a DM25m contribution from AgrEvo, the biotechnology company Schering jointly owns with Hoechst. Schering said operating profit was burdened by restructuring costs as profit growth came largely from enjoy lower tax rates than in Germany, the tax ratio was lower than

Sales were helped by the inclu-

- Leiras, a Finnish company which makes hormone treatments for women, and the east German Jenapharm, which makes contraceptives.

Leiras, which was included from September, had sales of DM91m Jenapharm, consolidated from October, contributed DM58m. After acquisition costs, however, neither company contributed to Schering

The company said sales in North "driving motor" behind the rise in biggest growth in sales came from

the fourth quarter. At the nine-sion of newly-acquired subsidiaries the therapeutics division, which rose 15 per cent to DM1.35bn. Sales of contraceptives and hormone therapy, Schering's traditional core business, rose 11 per cent to DM1.58bn.

Therapeutics benefited from sales of the multiple sclerosis treatment Betaferon, which rose 34 per cent to DM533m. However, sales in the US, where the product is sold under the name Betaseron, fell 4 per cent to DM350m following the introduction of a rival product by America and Europe were the Biogen, the US group, Schering said that in the fourth quarter the turnover. By product division, the number of Betaseron patients sta-

Analysts pointed out that Biogen's multiple-sclerosis treatment sales were also rising strongly, with the company now claiming more than 21,000 patients with numbers rising by 1,000 a month. Schering will also face greater competition closer to home in this sector as Biogen steps up sales in

Europe Further competition in the multiple sclerosis field is looming in the shape of Teva, the Israeli pharmacenticals company, which is due to launch a treatment called Copax-one. Analysts said Copaxone would lead to further competition in the US and increase pricing pressure.

upstream operations in 20 countries. "We probably need to be more diversified

EUROPEAN NEWS DIGEST

## Linotype-Hell set for DM82m loss

Linotype-Hell, the troubled German printing company which is being acquired by Heidelberger Druckmaschinen, said yesterday it expected to incur a group operating loss of about DM82m (\$49.5m) for 1996. The parent operating loss came to about DM73m. The group had warned last December that it expected parent losses of more than DM70m for 1996.

Linotype Hell said last year's figures did not include costs connected to its drastic restructuring programme. The reorganisation, which is expected to involve the loss of 1,200 jobs, or about one-third of its workforce, is aimed at concentrating its product range on equipment and systems for the graphics industry. "We expect the new structure will help us back into profits in the next two years," said Mr Bernbard Schreier, chairman. Sarah Althaus, Frankfurt

### Hoechst absorbs French unit

Hoechst, the German chemicals and drugs group, is close to acquiring all the shares in French subsidiary Roussel Uclaf, as part of its plan to group all its pharmaceutical interests in a separate listed company. The shareholders of Roussel Uclaf have offered Hoechst 11.575m shares, or 42.7 per cent of the equity, and the German company already holds 56.62 per cent. Buying out all the minority shareholders in Roussel will cost Hoechst a total of AFX News, Frankfur

Degussa, the German metals and chemicals group, said yesterday Mr George Behrakis, a US businessman, hadbuilt up a 5.12 per cent stake in the company in his family received a cash settlement of about \$100m and

The news helped lift Degussa shares 2 per cent, or DM14, to DM718 yesterday. Degussa's share price has the new management's strategy. Last year saw the appointment of a new chairman, Mr Uwe-Ernst Buie, and chief financial officer, Mr Heinz-Joachim Wagner. Analysts say the new management has adopted a more aggressive style than its predecessor, and established a

connection with its \$350m purchase last year of Muro Pharmaceutical, of the US. In the deal, Mr Behrakis, chief executive and former owner of Muro Pharmaceutical, and about 627,000 Degussa shares. Mr Behrakis holds an option to buy further stock in the German group.

risen sharply over the past year on investor confidence in clearer corporate structure.

### Hungary drugs group ahead

company, yesterday announced preliminary pre-tax profits of Ft11.35bn (\$66.2m) for last year, up 19.2 per cent in dollar terms on 1995. Sales were Ft36.7bn, up 11.2 per cent in dollar terms, with exports accounting for 67 per cent of sales. The results were alightly better than expected, although the shares failed to reflect this because of profit-taking, according to Mr Barna Papai, an analyst with ING Barings. Nevertheless, the company. performed well, especially in the former Soviet states, where sales rose 16.1 per cent to \$70.7m, Mr Papai said.

in 1995 to 24.7 per cent last year. This reflected stringent cost management and increased efficiency, the company Kester Eddy, Budapes

Maverick Total stays relaxed under fire

US criticism has not deterred French oil group from investing in 'outlaw' countries such as Iran

ight of the second of the seco largest French oil group, claims it hes not targeted "outlaw" countries such as Iran, Iraq. Libya and Burma as a source of production growth.

"It's just that the Lord put the reserves in places that are a hit hot on political grounds," insists Mr Thierry Desmarest, Total chairman. "And we're a bit more relaxed about such countries than some of our competi-

Such statements seem almost designed to irritate US politicians, who are keen to isolate such countries especially Iran - from international oil investment. And although Mr Desmarest denies any policy to cultivate such links, it is clear that Total sees itself in a different league from many of investment destinations.

'We're certainly more comfortable than some other European oil companies." he said in an interview with the Financial Times. "Only some Asian companies feel as free

to invest as we do." Although Total's 70 per cent stake in the \$600m project to develop the Shri offshore field in Iran has drawn the most criticism from Washington, the current international focus is on its operations in Burma, which include the Badamyar and

its European counterparts. Thierry Desmarest: Total chairman says there has been no adverse reaction from shareholders to investment policy

Unocal, the California- were attractive, he says. based company which is Total's partner in the Burma project, is coming under domestic pressure to follow the example of other US

companies and pull out. Mr Desmarest says Unocal has reassured him it remains committed to Burma, but he is relaxed about what would happen if Unocal did withdraw. "If they did have to leave, we could easily find other companies from Asia to replace them." Total

criticism of Total's involvement in countries with some of the worst buman rights records in the world, "We don't feel we're behaving in a wrong way," he says. "We use the same environmental, safety and health rules wherever we operate. I don't feel

there is any benefit in isolating countries. Although Total's actions have drawn political fire from Washington, he might even take part of the declines to be drawn on Unocal stake if the price whether - as some analysts

Mr Desmarest shrugs off ter of time before it withdraws from the US to avoid a possible confrontation. He says sanctions author-

> to punish investors in Iran's oil industry will not apply to downstream operations in the US. But he also careful to note that the US represents a small, and not particularly profitable, portion of Total's overall busines

To some industry observers, Mr Desmarest's relaxed approach to possible US diversification, Total has

### Interim dividend

An interim dividend of 30 cents per share in respect of the six months ended 31 December 1996 has been declared payable to members registered in the books of the company on 7 March 1997. The register of members will be closed from 10 to 20 March 1997, inclusive. The dividend is declared in the currency of the Republic of South Africa. Payments from the London transfer office will be made in United Kingdom currency at the rate of exchange ruling on 24 March 1997 or on the first day thereafter on which a rate of exchange is available.

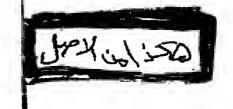

Dividend warrants will be posted on 3 April 1997.

The full conditions of payment may be inspected at the offices of the transfer secretaries of the company

## to sign up new ÚK label

Mr Macdonald, who flew to New York yesterday for a meeting at Sony Music's corporate headquarters, set up Independiente last autumn, after clashing with Poly-Gram, the Dutch entertainment group, over its plans to take control of Go! Discs.

All were boping Independiente's musicians would be as successful as Mr Macdonald's signings at Gol Discs, which include Gabrielle, the UK singer who is a nominee in this month's Brit music

The Independiente deal is not expected to include an equity element. Mr Macdonald's recent row with Poly-Gram was caused by the Dutch group's attempt to exercise its pre-agreed right to acquire the 51 per cent of Go! Discs it did not already own. PolyGram bought a 49 per cent stake in the label

Gol Discs has since been dismantled, except for the Go! Beat dance label which PolyGram is relaunching. PolyGram has dtstributed the former Gol Disc acts among its other record labels.

JP Morgan

# Sony set

Sony Music is in the final stage of negotiations to sign a multi-million pound deal with Independiente, a UK record label launched by Mr Andy Macdonald, who discovered Paul Weller, Portisbead and the Beantiful

his former record label. He has been holding talks with most of the world's large record companies, which have vied for the international distribution rights for Independiente's

industry awards.

Mr Macdonald is believed to have agreed the basis of a deal under which Sony Music, a subsidiary of the Japanese electronics and entertainment group, will pay several million pounds for the right to distribute Independiente's recordings everywhere but in the UK. Sony Music recently

renewed a similar agreement with Creation, the UK record company behind Oasis, one of the most successful rock groups of the 1990s. Sony paid £14m (\$22.8m) to extend for five Creation's music outside the UK and owns 49 per cent of

its equity.

in 1987. PolyGram had hoped that Mr Macdonald would remain with Go! Discs after the takeover. He refused and resigned, after selling bis 51 per cent stake for an estimated £12m.

Several senior Gol Disc executives bave left Poly-The latest figures released for NetHold - at the end of last August - showed that it has signed a number of new awaited of Independiente's first releases is the debut album by Travis, one of Mr Macdonald's early signings,

posts and telecommunications utility, in a lawsuit which the 121-year-old paper maker had itself initiated. KNP launched a suit last July claiming that confusion surrounding the similarity between their acronyms had led at least one US investor to place a large order for shares in the wrong company.

The two called a truce last month but only yesterday disclosed partial terms, under which Komnklijke PTT Nederland will "contribute to the costs of this change, which will include the respective publicity campaign." Mr Bouke de Vos, a KPN official, said the sum agreed was a fixed amount, although the plaintiff company could not yet estimate the total amount needed. For KNP, Mr

KNP BT, the Dutch paper, packaging and distribution group, will have to change its name as a result of a settlement reached with KPN, the country's privatised

would probably require the use of an outside agency to identify suitable titles. It intended to keep the initial K for its "Koninklijka" (royal) designation, an honour bestowed by the Dutch monarchy. KNP Leykam, the paper making division which was tha original core of the group, would meanwhile retain that name. The group, which is seeking a partner to invest in the lossmaking division, insisted it found the outcome satisfactory although it acknowledged it would have to Gordon Cramb, Amsterdam bear part of the cost.

Patrick de Leede said the shift, to take place next year,

### Huhtamaki advances 33%

Huhtamaki, the Finnish-based international foods group which restructured beavily last year, is to double its food packaging volume in Asia Pacific by acquiring Hong Kong-based Pacific World Packaging. Mr Timo Peltola, Huhtamaki chief executive, said the purchase would broaden the geographical reach of Huhtamaki's Polarcup packaging division. The value of the deal was not

PWP, a privately-owned group with annual sales of about \$75m, has a presence in Australia, China, Taiwan, Malaysia and Hong Kong. Polarcup's activities are concentrated on south-east Asia. Mr Peltola said the acquisition would give Polarcup a dominant market position to Asia-Pacific, building on its number one position in Europe.

Meanwhile, Huhtamaki announced a 33 per cent rise in full-year profits. Pre-tax profits, excluding exceptional items, advanced from FM312m to FM416m (\$85m), overcoming a dip in net sales from FM7.8bn to FM7.5bn. Net exceptional income, relating to a string of disposals during 1996, was FM126m. Operating profits improved from FM465m to FM529m, despite the sale of Leiras, Huhtamaki's pharmaceuticals division, to Schering of

However, operating earnings at Leaf, Huhtamaki's onfectionery brand, dropped from FM252m to FM227m. This followed a 29 per cent decline in profits in Leaf's North American operations which was blamed on slow sales. Leaf's operating profits in Europe and Asia were stagnant at FM170m and overall Leaf sales were also static at FM4.3hn. Polarcup operating profits progressed from FM161m to FM214m, belped by lower raw material prices and high capacity utilisation. Sales rose from FM2,48bn to FM2.55bn. Greg McIvor, Stockholm

### Gomez joins Wasserstein

Mr Alain Gomez, former head of Thomson, the French state-controlled electronics group, has joined Wasserstein Perella, the US tovestment bank, as a Paris-based senior adviser. The move comes almost a year after Mr Gomez, 58, resigned from the Thomson chairmanship to which he was appointed by France's then socialist government in 1982. He was brought in to supervise the company's

nationalisation. The public line on his dismissal last year was that the group needed someone new to take it back into the private sector. However, it emerged that a further reason was talks the group had beld on an alliance with General Electric Company, of the UK. Mr Gomez's support for an d to have cut across the government's belief that French companies should first regroup among themselves and then seek new European tie-ups. Prime minister Alain Juppe's current centre-right government is still trying to decide how best to privatise Thomson CSF, Thomson's defence electronics arm, after a botched attempt last year to sell off the whole group.

### SocGen in restaurant link-up

Société Générale, the French banking group, yesterday announced an agreement with Transmedia, operator of a restaurant payment system. Clients of the bank's Visa Premier service will be able to subscribe to the Transmedia service, which in exchange for an annual subscription fee offers clients restaurant discounts. Transmedia, in return, gets access to important information on its customers' spending patterns.

The move represents a shift within the relatively restrictive French legislative framework towards banks issuing co-branded cards and forming partnerships in an effort to boost business. However, French banks are restricted in their involvement, because their use of financial information on customers is limited by civil liberties regulations, and an agreement between the banks rules out the development of co-branded credit

Customers will be issued with a single plastic card bearing both the Transmedia and Societé Générale logos. which they can use to pay restaurant bills, with a net discount of 18 per cent credited to their account at tha end of each month. As part of the deal, Société Générale is to buy a 10 per cent stake in the French subsidiary of the US-based Transmedia, which is otherwise owned by the US parent and its European affiliate.

A number of French retailers have developed credit cards linked to financial institutions, and American Express recently signed an agreement for a fidelity card with Accor, the hotels and leisure group. Mr Ziad Sarkis, head of consultants Mitchell Madison in Paris, said: "This is an interesting example of the best sort of thing a French bank can do given limitations on co-branding and

### AGF denies merger talks AGF, the French insurer privatised last year, yesterday

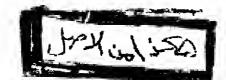

denied it was in discussions either with potential . acquirers or target companies which it might be interested in buying. In the wake of speculation which has boosted the share price, the group said there had been no talks with Allianz, the German insurer which last month bought Allianz Via Holding France, a group of insurance businesses held by Navigation Mixte. AGF argued that any attempt by Allianz to take it over

could run into considerable difficulties, in part because it has a standstill agreement with the rival German insurer. AMB, in which it owns 33 per cent, until 2000. It also has a contract with the French post office for the sale of life assurance contracts, which could run into difficulties if the insurer were bought by a foreign company. It said hostile takeovers in France had traditionally proved costly and unsuccessful, and that Allianz might also be forced to sell its trade credit insurer in order to buy AGE. which has control over a series of rival insurers.

Both Allianz and Generali, the Italian group which last year untangled its cross-shareholding with Aza-UAP, are now in a position to consider extending their insurance interests in France. In the wake of the merger of Aza and UAP, announced in November last year, there has been considerable speculation about further takeovers in the

## Matsui move | Shift to fixed income pays off at Peregrine sparks wave of fee-cutting

A stream of foreign and the-counter shares in the response. past 10 days in response to a similar move, announced in late January, by Matsui Securities.

Mr Michio Matsui, president of Matsui, a small independent broker, took the securities industry and the finance ministry by surprise when he announced the cut in commissions. The unilateral decision

prompted a mini-revolution in the country's hitherto what analysts describe as Japan's first wave of discourt broking.

The finance ministry has been studying proposals to liberalise fixed commissions on trading at Japan's stock exchanges, but is not expected to make a decision until next year.

Fixed rates of commission apply to all trades up to Ylhn (\$8.1m) in value on Japan's stock exchanges, but fees for trading in OTC stocks can be set freely. Traditionally, bowever, uniform commission levels have been set for trading of OTC stocks and convertible bonds.

Within hours of Mr Maisui's announcement, Paribas Capital Markets said it would match the cuts and implement them ahead of Matsui Securities, which had said the discount would apply from early March. Crédit Lyonnais Securities year there are additional and Nippon Securities, ones," Mr Suzuki said.

SECURITIZATION Financial Advisor & Sole Placement Agent SA.de C.V. \$280,000,000 & Bankers Trust Unique insights stem from unique knowledge. Knowledge that often comes from long-term, committed relationships. This was the case with Bankers Trust and Teléfonos de México, S.A. de C.V. (Telmex), Mexico's premier telecommunications provider. It was our long-standing relationship that allowed us to understand and anticipate Telmex's need to raise capital by arranging a short-term financing solution that was both cost-effective

and quickly executed. More importantly, it was our relationship that allowed us to uncover a market opportunity that others had not yet anticipated. Our extensive structured finance expertise, our insight into the international capital markets and an understanding of our clients' objectives enabled us to creatively structure this deal. The combination of the investment grade rating, short-term maturity and desirable yield made the securitization very attractive to a large group of investors. So attractive, in fact, that although the transaction was initially sized at \$200 million, market appetite was so strong that it allowed Telmex to increase the size of the financing to \$280 million. We welcome the opportunity to discuss how we can develop equally innovative solutions to your financial challenges.

## Conrail bid battle reaches stalemate

dollar bid battle for Conrail, one of three big freight railway operators in the eastern US, be in dan-ger of hitting the buffers? It looks a possibility in the face of the current stand-off between the rival bldders. CSX, the biggest eastern

US railway operator, last month failed to win the support of Conrail sharebolders for an agreed \$9.4bn merger. But Conrail is preventing Norfolk Southern, CSX's rival, from pursuing its \$10.5bn hostile bid by using the strict anti-takeover laws that pravail in Conrail's home state of Pennsylvania.

Faced with the stalemate, all three parties have agreed to hold a series of confidential meetings to see if some sort of deal can be thrashed out. But given the background to the takeover batto bet on an early resolution.

Conrail may be the smallest of the big three eastern lines, cutting costs and into the New York region.

## VF unveils \$150m reorganisation

VF, the world's biggest quoted clothing company. announced it was to give "an unprecedented push" to its Wrangler jeans and other main products, backed by a business reorganisation expected to cost \$150m over the next few years. It also reported a 24 per cent increase in underlying fourth-quarter net profits to \$82.7m, or \$1.28 a share, excluding a restructuring charge in the prior year. Sales rose 8 per cent to \$1.4bn.

Underlying net profits for the full year rose 15 per cent to \$299.5m, but sales were sluggish, rising 1.5 per cent to \$5.1bn. VF's products include Wrangler and Lee jeans, Red Kap workwear, JanSport backpacks and Vanity Fair Richard Tomkins, New York

### Calpers names poor performers

Apple Computers and Reebok International are among the 10 poor performers named in an annual list published by the California Public Employees a Retirement System (Calpers), the largest US public pension fund. Calpers will target the 10 companies in its corporate governance activism for the 1997 proxy season, which is just starting.

Tha fund says "Apple's top management lacks experience in the personal computer business" and the

pension fund is "dissatisfied with the high salaries paid to management in light of poor financial performance". Last week, Calpers voted against Apple'a board at its shareholders' meeting. Reebok is on the list, despite a rise in its stock price, because Calpers is "concerned that Reebok's management has operated with insufficient accountability to the board". Tracy Corrigon, New York

### Fidelity fund reverts to equities

Fidelity's Magellan Fund, the largest mutual fund in the US, made heavy sales of bonds during December as it continued to return to its traditional strength in equities. figures published yesterday by Boston-based Fidelity Investments reveal. Magellan now has net assets of \$55.15bn, but suffered outflows of almost \$6bn last year as investors reacted to the decision in late 1995 by Mr Jeff Vinik, its former manager, to invest in bonds. According to Fidelity's latest figures, Mr Robert Stansky, Magellan's new manager, cut the fund's veighting in bonds from 7.9 to 3.8 per cent during December. A year earlier it had been 18.1 per cent. However, he refrained from substantial changes to the balance of the equity portfolio. John Authers. New York

## **North American** paper groups soared over the past 12 months, from about \$60 in face shake-out

in Toronto and Robert Gibbens in Montreal

Rationalisation of North America's pulp and paper industry is set to leap forward with several of the biggest producers involved in merger and takeover talks.

Toronto-based Ahitibi-Price and Stone-Consolidated of Montreal were on US high-technology companies, Intel is believed to be the largest manufacturing would have created the producers, especially in Canada, have so far been slower than their European countries. company to grant options to world's biggest newsprint terparts to respond to these

The talks broke off late on Monday, but are expected to resume.

Speculation also centres on Avenor, the Montrealbased pulp and newsprint producer, which is trying to pusb through a proposed acquisition of Repap, which specialises in high-quality

printing papers and pulp. Avenor's all-share offer, worth C\$3bn (US\$2.2bn) including C\$2.4bn in Repap lukewarm reception from institutional shareholders

According to several analysts, Avenor may itself become a takeover target if Consolidated reported 1996 the Repap deal fails. Among those mentioned as possible predators are Montreal-based Donohue, as well as Abitibi and Stone.

products industry is under pressure to streamline operations, given the recent slump in pulp and paper prices, relatively small, out dated mills, and intense competition from low-cost producers in Asia and Latin America. Nawsprint producers recently delayed a 15 per cent price increase due to take effect on February 1.

However, North American producers, especially in Canfairly high degree of consolidation," one Toronto analyst said yesterday.

Abitibi and Stone have a combined newsprint capacity of about 3.9m tonnes, compared with 1.8m tonnes at Finland's UPM Kymmene, tha biggest European producer. The big Scandinavian gronps, which currently have a relatively small presence in North America, are frequently mentioned as posdebt, has so far received a slble buyers in the US and Canada.

Abitibi posted 1996 earn: ings of C3104m, including a small fourth-quarter loss, on sales of C\$2.6bn. Stoneearnings of C\$164m on sales of C\$2.3bn.

Abitibl lost 25 cents to C\$21.85 in early trading in Toronto yesterday. Stone The North American forest was unchanged at C\$20.65.

# Unilever

Sales rose by 8%, at constant rates of exchange. Operating profit and net profits were 15% and 10% ahead of last year respectively.

The net effect of acquisitions less disposals accounted for 4% of the sales increase. Underlying volume growth, at 2.5%, was alread of 1995, driven by continued strong growth in our developing iging markets and improvements in North America.

The increase in operating profit reflects the sales growth and some improvement in underlying margins. Profits were lifted further by lower pension costs and the hencitis following the trade deloading in 1995 in the United States.

Higher tax costs and lower prior year tax credits, combined with increased minority interests,

1996 saw a continued high level of acquisitions and disposals. A net investment of £860 million was made for a total of 27 acquisitions and 23 disposals. Notable among the acquisitions were the purchases of Helene Curtis and Diversey. Total proceeds raised from the disposals were £420 million.

In the year, there were exceptional credits of £111 million and these have been utilised to fund restructuring of £351 million, while maintaining ort exceptional items in operating profit at last

At average rates of exchange prevailing in each year, net profit increased by 9% in sterling, 13% in guilders and 8% in US dollars.

Net profit before Exceptional Items encludes the after tax effect of Exceptional Items in Operating Profit and the Exceptional Profit on disposal of fixed assets.

BUSINESS PERFORMANCE

To facilitate comparisons with 1995, the following commentary is given on the basis of the siness performance before exceptional items and at constant rates of exchange.

The trading environment in Europe was still marked by low consumer confidence in two of our

most important markets, France and Germany, In North America, steady progress in the economic conditions provided the basis for better results. Consumer demand in the fast growin developing and emerging markets remaioed strong and our growth momentum has continued. In Europe, reported profits rose by 7%, but this was assisted by lower pension costs. Excluding

this, profits were that. Benefits from restructuring and portfosio improvements were offset by the setback in our frozen foods business following the BSE criais and lower ice cream sales due to the poor summer. Market shares in ice cream were held. Our overall market share in yellow fats improved slightly and profits advanced. Culinary products made good progress.

In Detergents, an increase in sales and profits was assisted by the contribution from the sition. Consumer detergents had a better year. Overall, laundry shares were ined and our personal wash business strengthened its position. Personal Products had a year of increased profits with deodorants achieving excellent results. In Prestige, Calvin Klein continued its success with further strong growth across Europe. In Speciality Chemicals volume was up, but sales were flat due in lower prices. Profits,

nowever, were well ahead due to an improved mix and lower costs.

In North America, results were substantially ahead of lost year. With the return of sales to normal operating levels following the deleading in 1995, profits

increased in our culinary category. In yellow lats we achieved record market shares and profits rose strongly Profit margins in ice cream were affected by higher raw material costs but market share was maintained. Sales in Delergents advanced. Profits were well ahead of last year, with good onderlying volume growth in laundry and also in personal wash. In Personal Products, the acquisition of

Helene Curris led in an overall rise to sales and profits. Higher marketing expenditure following product launches at Elizabeth Arden and Calvin Klein held back profit growth. In Speciality Chemicals, profits grew strongly due to new product innovation and lower

In Africa and Middle East, volume growth was widespread and results improved. The best performance was again recorded in South Africa but we had a particularly difficult year in Kenya. Detergents and Beverages were the best performing categories. Results were assisted by the full

consolidation this year of our Nigerian subsidiary.

In Asia and Pacific, sales and profus grew strongly. Detergents and Personal Products again were the principal drivers of growth. Profitt in Speciality Chemicals were well ahead of last year. India produced another outstanding performance across most categories. Indonesia and Thailand. ed to grow strongly. Sales growth in China was again very strong, driven by persona products and detergents. The only exceptions to this buoyant performance were Australasia and

In Latin America, good growth was accompanied by an excellent increase in profits. The balance of our perifolin was improved further by the disposal of commodity businesses and acquisitions in key consumer categories. Growth was driven by detergents and personal products, principally in Brazil and Chile. Results were less satisfactory in Colombia and Venezuela but the rformance in Mexico was much improved-FOURTH QUARTER

Few conclusions can be drawn from this quarter's results, due in the impact of the different phasing of exceptional items in 1996 as against 1995. Sales increased by 7% at constant rates of exchange and net profit rose by 64%. Excluding exceptional items and the effect of lower pension costs, net profit was 10% ahead.

At average exchange rates prevailing in each period, net profit increased by 50% in sterling, 67% in guilders and 57% in dollars.

Net debt, at closing rates of exchange, stood at £1.7 billion at the end of the year compared in \$1.9 billion at the same time has year, despite the much higher level of acquisit nety higher cash flow from our operations. Net gearing, at 23%, was slightly below last year.

Last year, the Boards decided to set the interim dividend at 35% of the previous year's total dividend in the stronger of the two reporting currencies. As a consequence, interior dividends, declared on 8 November 19%, increased by 46% in sterling and by 51% in guilders.

The final dividend therefore reflects this new policy. The Board will recommend in the Annual General Meeting, to be held on 6 May 1997, a total dividend of 32.05p per 5p Ordinary share. This represents an increase of 9% over last year. As a result, the final dividend will be 21.76p. Looking ahead, the overall economic situation in 1997 is likely to he similar in 1996; generally

favourable. We see little reason, however, to helieve that conditions in Europe, particularly in France and Germany, will improve. In developing and emerging markets and in North America, we expect to build on the progress we have made in 1996. We are confident that the accelerated restructuring programme we have put in place, together with sharper category focus, better innovation and the new organisation, will enable us to improve profitability further in 1997.

ACQUISITIONS AND DISCONTINUED OPERATIONS

In 1996 the effect on turnover and operating profits of acquisitions made in the year was £1,258 flion and £[11] million respectively. There were no discontinued operations in 1996 or 1995. EXCHANGE RATES

The results for the quarter and the comparative figures for 1995 have been translated at constant average rates of exchange, being the annual average rates for 1995. For our reporting currencies these were £1=F1. 2.53 = US \$1.58. In addition, the net profit and combined carnings per share for the quarter, and the comparative figures for 1995, have been translated at the average rates current arter. For our reporting currencies these were £1=FL 2.74 = US \$1.61 for 1996 and C1 = F1.2.47 = US S1.54for 1995.

[3] = Fl. 2.47 = US \$1.54 for 1950. The results and combined earnings per share for the full year 1996 have been translated at the annual average rates for 1996. For our reporting currencies these were \$1=Fl.2:62 = US \$1.56. The 1995 figures for the full year have been translated at the annual average rates for 1995. The trends are therefore influenced by changes in exchange rates between 1995 and 1996.

The profit and loss account and supplementary information contained in this document is a provisional and abridged version of that which will appear in the Group's full accounts in be published on 29 March 1997. The full accounts for Unilever N.V. and Unilever PLC have not yet been filed with the Commercial Registry in the Netherlands, the Registrar of Companies in the United Kingdom or the Securities and Exchange Commission in the United States, and have not

The Boards have resolved to recommend to the Annual General Meeting in he held on 6 May 1997 the declaration of final dividends in respect of 1996 on the Ordinary capitals at the following rates which are equivalent in value at the rate of exchange applied in terms of the Equalisation

| DIVIDENDS              |        | 1996    | 1995   |
|------------------------|--------|---------|--------|
| PLC per 5p ordinary    | -final | 21-76p  | 22.35p |
|                        | -total | \$2.05p | 29.40p |
| N.V. per Fl.4 ordinary | -final | FL4.75  | FL4.71 |
| •                      | -total | F1.6.98 | FL6.19 |

The PLC final dividend will be paid on 23 May 1997, to shareholders registered on 11 April 1997. The N.V. final dividend will be payable as from 23 May 1997 against dividend coupon

For the purpose of equalising N.V.'s and PLC's dividends under the Equalisation Agreement, the Advance Corporation Tax ('ACT') in respect of any dividend paid by PLC has to be treated as part of the dividend. PLC's 1996 final dividend now announced has been calculated by reference to the current rate of ACT (twenty/eightieths); if the effective rate applicable to payment of the dividend is different, the amount will be adjusted accordingly and a further announcement made.

The Annual Review and Annual Accounts for 1996 will be published on 29 March 1997. The results of the first quarter 1997 will be announced on Friday 2 May 1997. For copies of Unilever results statements telephone Freephone 0600 121 891 or write to: Unilever Corporate Relations, P.O. Box 68, Unilever House, London EC4P 4RQ, or P.O. Box 760, 3000 DR Rotterdam. # European double trouble takes shine off Unilever

By Gordon Cramb in Rotterdam

Europe, where Unilever has long been struggling to improve its returns, produced a twin blight last year on the Anglo-Dutch gronp's otherwise healthy results. Poor summer weather cream sales, while the UK's BSE crisis hit products like frozen hamburgers.

Mr Morris Tabaksblat, co-chairman, estimated that the two problems together had cost the group Fl 150m (\$89.7m) in profits. Sales in Europe were flat at £16.3bn, while a 6.2 per cent rise to £1.53bn in operating prof- stage.

its was attributable entirely to lower employer pension contributions.

This windfall was a main factor behind a 79 per cent leap in fourthquarter pre-tax profits worldwide to £741m, giving earnings of 22.42p per share against 14.65p. Pre-tax profits in its biggest market set back ice for the full year rose 9 per cent to £1.61bn, for earnings of 85.9p (78.63p).

A total dividend of 82.05p (29.4p)is roposed. This includes a final pay-out of 21.76p, following a change in policy which saw an enhanced distribution, equivalent to 35 per cent of the previous year's total, at the interim

A net £166m was debited in Europe, while by operation the biggest deductions came in the foods side, absorbing £138m of the total.

Capital spending dipped 3.7 per cent to £1.17bn, while research and development outlays were up 2.6 per cent to £600m. The advertising and promotion

## Giant breaks free from the shackles

'd rather have anything than indifference," runs Lthe catch line of an advertisement for 'ck two' a new Unilever fragrance.

Yet an indifferent share performance is what investors have endured in recent yeare as the Anglo-Dutch consumer goods company has struggled to revive profits in mature European and North American markets and build new businesses in emerging economies.

So Unilever'e gamble yesterday to break free of those constraints won resounding applause from shareholders although they and the company are well aware of the risks over the next few years. Selling its speciality chemical businesses to fund consumer goods acquisitions is fraught with problems.

The biggest is finding businesses equal, if not better, than speciality chemicals. one of Unilever's best performers, as a generator of cash and profits.

The road to this historic egy, and operational performoment for Unilever began in 1993, Mr Niall FitzGerald, chairman of the UK division. said yesterday. With 57 cate-

Food and personal product areas neighbouring Unilever's open up a vast territory for it to do deals. Steely discipline in that will be the next challenge for Mr Fitz-Gerald and Mr Tabaksblat.

## £6bn speciality chemicals sale

By Clive Cookson. ence Editor

The disposal of Unilever'e four speciality chemicals businesses, valued by analysts between £5bn and £6bn (\$9.78bn), will be the latest development in a turbulent year of restructuring for the

Recent moves include the spin-off of Ciba Speciality Chemicals from the Novartis drugs group, the merger of Hoechst's speciality business with Clariant, and Roche's purchase of the Tastemaker synthetic flavours business.

Any of those might be interested in buying some or all of the four businesses. They had a combined turnover of £3bn in 1996 and an average operating margin of 14.1 per cent, producing an operating profit of £415m. Other potential purchasers include Bayer, BASF and Henkel of Germany; DuPont, Great Lakes and WR Grace of the US; Akzo Nobel of the

Netherlands; and ICI. Together the Unilever businesses make up one of the world's largest speciality groups - the largest is the

 National Starch and Chemical, based in the US, accounts for more than half of Unilever speciality chemicals. Its turnover of \$3bn a year is divided between industrial adhesives, resins and starches.

Queet International, sed in the Netherlands, is a leading manufacturer of fragrances, food flavours and ingredients. Its turnover is just under \$1bn a year. • Unichema International, Netherlands-based, makes "oleochemicals" from natu-

ral oils and fats. Sales are \$750m a year. · Crosfield, based in War rington, is the baby with annual turnover of \$400m. It converts silica and alumina into particles with a wide range of applications, from

toothpastes to plastics. The most sought-after business is likely to be Quest. On the basis of the \$1.1bn that Roche of Switzerland paid last week for Tastemaker, a smaller US flayours company. Quest alone

would be worth \$3bn. Unilever is being advised by Lazard Brothers and Laznew combination of Clariant and Freres, which will also and Hoechst, with total sales conduct the sale.

### **SPOT THE REFUGEE**

There he is. Fourth row, second from the left. The one with the moustache. Obvious really.

Maybe not. The unsavoury-looking character you're looking at is more likely to be your average neighbourhood slob with a grubby vest and a weekend's stubble on his chin.

And the real refugee could just as easily be the clean-cut fellow on his left. You see, refugees are just like you and me.

Except for one thing.

Everything they once had has been left behind. Home, family, possessions, all gone. They have nothing. And nothing is all they'll ever have

unless we all extend a helping hand. We know you can't give them back the things that others have taken away.

We're not even asking for money (though every cent certainly helps). But we are asking that you keep an open mind. And a smile of welcome.

It may not seem much. But to a refugee it can mean everything.

UNHCR is a strictly humanitarian organization funded only by voluntary contributions. Currently it is responsible for more than 19 million refugees around the world.

Texas Instruments, the US semiconductor maker, has launched a digital signal processor chip which can bandle 1.6bn instructions per second - about 10 times more than the fastest chips available today.

The TMS320C620 will enable faster communications and more efficient mobile telephone and other services. TI claims that a file that currently takes 10 minutes to download over the Internet could be retrieved in less than five seconds. Similarly, the chip is expected to enable callers to use one telephone line simultaneously for voice and data. It could also allow cellular network operators to shrink the size of today's typical 100 sq ft.

Using the Net · Richard Waters

## New sales vehicle revs up

This is tipped to be the year when car manufacturers and dealers arrive on the web en masse

p in the far north of ldaho, a vehicle dealer by the name of Ken Smith is discovering the joys of the Internet.

Smith's Dodge franchise is already one of the best known in the north-west. From his showroom in Kellogg, a town of 3.41? souls in the foothills of the Rocky Mountains, the enterprising Smith sold 4,783 new vehicles last year. and another 1,000 or so used ones. It wasn't the World Wide Web that brought all those buyers. Dave

Smith Motors, which is named after the present owner's father. bas long had a reputation for selling at beavy discounts. "It has been a big word-of-mouth thing," Smith says.

One of the virtues of the web though, is that It can belp word-of-mouth spread faster. Smith appeared on the Internet last summer: since then, around 30 or so sales have come from computer users who have cruised by his site. and two employees now spend their time responding to customers who make cootact by e-mail.

"I think the industry is a year and a balf away from the Internet really taking off," Smith says. The popularity of the web is beginning to intrude at all levels of the US vehicle industry - with implications for the way Detroit

and the country's 50,000 or so dealersblps go about their At one level, it is beginning to have an impact on the industry's traditionally territorial dealer system, allowing entrepreneurs such as Smith to step more easily

on to their neighbours' turf. At another level, it is enabling vehicle manufacturers to get closer to their customers - and to make communications flow more smoothly around their extensive international operations.

The dealers are likely to feel the effects first. "In the long run, [the Internet] will build a stronger dealar network," says Richard Everett, director of interactive technology at Chrysler. But in the short term, it could cause considerable disruption. Even before the Internet

intruded oo their lives, other Dodge dealers in the north-west were trying to persuade Chrysler. the vehicles' manufacturer, to stop allocating so many of its top-selling

trucks to Smith. The Internet is likely to make this sort of rivalry far more intense. By most estimates, only around 5-10 per cent of dealers in the US have a presence on the web at the

moment - but 1997 is the year when a mass arrival is generally tipped to take place.

**Information** Technology

• The FT's review of Information Technology appears on the first Wednesday of each month

One result could be the emergence of more regional super-dealers like Smith. That would echo other forces already at work in the US's \$300bn (£194bn) new vebicle market, as public companies begin to target a

distribution system that has until oow been the preserve of small, private businesses. Another result is the appearance of a new type of intermediary.

Interposing itself between customers and the dealers. Going hy names like Auto-By-Tel and AutoVantage, these services invite users to submit requests for vehicles they want to huy, then feed those requests to dealers near the customer's bome who have

paid to be part of the network. The dealer then contacts the potential buyer direct. Efforts to tie both buyers and dealers into these new networks are multiplying. Auto-By-Tel has

arrangements with Chase

buying cars to submit online requests for loans and insurance. Now, to preserve its oetwork

from competitors, the company has started trying to get its 1,200 paying dealers to sign exclusivity contracts. By agreeing not to join rival networks - and by agreeing to let Auto-By-Tel train their sales staff in basic common levels of

service - dealers are tying

otber

mation.

themselves increasingly closely to the system. s is the way of the Internet, Auto-By-Tel itself feeds off Lother popular sites, with a large proportion of its visitors coming through Microsoft's CarPoint, or through Edmund's, a popular provider of pricing and

The vehicle manufacturers seem content to sit back and let these forces take their course - while themselves using the Internet in Manhattan and American ways that could alter their oppeared on January International Group for people traditional relationships with 11 and November 20.

vebicle

infor-

dealers. Chrysler, for instance, is trying to use its web site to find out more about its customers' car-buying

preferences. The key is a specification system in the company's weh site which allows potential buyers to build a picture of the vehicle model they

want, from its colour to its range of accessories. The price is calculated automatically. The buyer can then print off the details and go to the dealer armed with the specification "without being forced to accept whatever is on the dealer's lot", says Everett.

"It used to be, when you visited the dealer, be beld all the cards", including details of price, he adds. In an online world, that information advantage could start to be eroded. By collecting the do-it-yourself

specifications, Chrysler also hopes to have a far better idea, and far quicker, of what customers in general want. That should enable it to adjust its output more rapidly. Gathering this information will not be possible until at least the end of

this year. Everett says. The big US vehicle makers have also begun to turn to the World Wide Weh for ways to make their

internal communications more Ford Motor took the decisioo 18 months ago "to move to the web as its way of doing business", says Stevie Cote, the company's head of information management. That decision led to the launch of an intranet hub last summer: Netscape's browser has been deployed to 50,000 employees and the company has so far put 15,000

people through training to use the The network is being used by the various people involved in Ford's new vehicle programmes to

transfer technical and other information between themselves, the company says. It is also an important tool in Ford 2000, the company's ambitious reorganisation aimed at turning itself into a global company, making it possible to communicate with large numbers of people quickly. "The Intranet is absolutely key to handling large-scale change in a large

This article is part of a series on how different industries are exploiting the Net. Previous articles appeared on January 29, December

organisation," says Cote.

## SOFTWARE VIA THE NET Linux's operating system

plan: take software developed for free by other people, stick it on a CD-Rom and sell it for \$59 undercutting all your competitors by several thousand dollars.

Several companies survive by selling disks of 'shareware" - software the anthors give away for free trial - but corporate customers, which would buy hundreds of copies and be prepared to huy technical support, tend to avoid unbranded software.

Caldera, a private US company, is courting the corporate and small office market with Linux, a free operating system to which it adds its own utilities and technical support. Linux, designed to be

compatible with the Unix standard running many of the most powerful computers and Internet systems, was written by Linus Torvalds of Finland in 1991, and published on the Internet, where teams of votunteers update it. Caldera has the benefit of

financial backing from the Ray Noorda family trust, and has Ray Noorda, former chief executive of networking company Novell, as an adviser. But Linux has no pedigree, no powerful supporters, and if it has been heard of at all, is usually regarded as a

Sales by

the bundle

toy for maths students. Caldera, which has just launched its OpenLinux base system, is responding by going for niche markets

operating system's image. Apart from forming alliances with big names such as Netscape and, predictably, Novell, it is applying to use the Unix the X/Open consortium.

"We think this is very important," says Ranson important issue." The

brand name, controlled by Love, vice-president of sales and marketing for Caldera, because governments feel

standards compliance is an company is pushing Linux towards the Unix standard, but because the hundreds of

volunteering evenings and weekends for the work, tt is not a quick procedure. "One of the key things want to do is to work and trying to change the

directly with the Linux community, [which] makes the process a little blt slower than if we just funded the work ourselves," Love says. The upside is that the company, with just 30 staff, sells a product directly comparable with Microsoft's Windows NT or

Sun's Solaris. However, Caldera is not attempting to compete head-on with these giants. Instead, it is going for markets thet emphasise Linux's main strength -

networking. Not surprisingly for a product developed purely over the Internet Linux has comprehensive networking, with support huilt in for Windows, Appletalk and the top protocol used on the Net, as well as the ability to act as a dial-up server. Caldera has just licensed Novell's system, which will complete the set.

In hig corporations - Bell Laboratories and South West Airlines are customers - Love pushes Linux as the "glue" that holds the many different networking standards together. With smaller companies he sells on price: rather than spend thousands on a commercial Unix to connect to the Internet and to home workers, and then more on hardware to support the memory-bungry operating system, Linux will run on a cheap 486-based PC.

Malcolm Beattie, a systems programmer who uses Linux to run Oxford University's main World Wide Web server, claims it is better than the expensive options. "It is more secure straight out of the box than most commercial systems against people coming in over the network," he says. as well as being faster.

# Canal Plus

By Edward Luce

Canal Plus, the French pay television service, yesterday offered a FFr2bn convertible bond exchangeable into shares in a leading Italian media company.

The dual-currency offering, priced to yield 3.5 per cent, will be convertible into shares in Mediacet, the Milan-listed media holding company of Mr Silvio Berlusconi, the Italian businessman, which launched its ind-

tial public offering last year. Canal Plus is merging with NetHold, an Italian media company which owns 6.6 per cent of Mediaset. The offering, which will help finance NetHold's acquisition of Mediaset shares, is convertible at a 15.8 per cent premium to the shares equivalent to L8,500.

"The issue has been well received in the UK, Switzerland and Italy," one dealer said yesterday. "It is perceived as an elegant way of refinancing NetHold's

The offer is being led by **UBS** and Lehman Brothers in London. "It is quite unusual for a French company to choose non-French banks to lead manage a convertible issue," a syndicate

official in London said. The offer includes a provision for converting into a pure bond if the NetHold merger does not go ahead within six months of the settlement. The merger is expected to take place by April. The company can exchange the bonds for cash instead of shares within 23 days of investors choosing to convert. The five-year bond is callable after four

MARKETS REPORT

were driven higher by a severe shortage of stocks in New York which has encouraged arbitrage between the US Arabica contract and the UK Robusta.

Reports of a national strike in Colombia had sparked fundamental concerns. And roasters, the end users who have stayed away in the hope of lower prices, have been caught out by bnying from speculative funds and are now trying to get into a tight market.

The London contract for May dalivery rose \$43 to \$1,643 and dealers said the arbitrage against New York reached 89 cents.

Cocoa remained on the sidelines with the March contract falling £15 to £844 and the May contract slipping £13 to £869.

While there are concerns about oversupply from West Africa, cocoa has increasingly become a pure currency play as the strength of sterling overrides the fundamentals.

London Metal Exchange constituents slipped in spite of inventory figures showing a downturn in stocks. Aluminium fell \$38 to \$1.547 during late trading on profit-taking and liquidation of long positions by

investment funds. Lead fell \$18 to \$644 and Nickel rose initially on the larger than expected drawdown but closed \$105 lower at \$7,730.

## China poses 'no threat' to grain supplies

By Alison Maitiand

China's growing demand for grain imports poses no threat to world grain supplies or food prices, according to a report by the International Food Policy Research Institute.

The study runs counter to predictions by tha Worldwatch environmental research institute in Washington that Chinese grain requirements threaten to overwhelm world supplies.

The IFPRI, a Washingtonbased research body specialising in sustainable food production, says Chinese investments in agriculture will lead to increased domestic China from bankrupting world food supplies."

The country's grain imports should rise to a record 24m tonnes in 2000 and 27m in 2010, but stabilise at 25m tonnes a decade later.

the report says. These figures are lower than those projected by the Organisation for Economic Co-operation and Development in November. It put grain imports at about 40m tonnes in 2000 and 43m the 21st Century. IFPRI, 1200 tonnes in 2010, but also con- 17th St NW, Washington DC cluded China would not 20036-3006

deplete world grain markets. Mr Mark Rosegrant.

research fellow at IFPRI and co-author of the new report, said his predictions were based on the most recent figures on Chinese government investment in irrigation and agricultural research, which resumed in the early 1990s.

Mr Jikun Huang, director of the Centre for Chinese Agricultural Policy in Beijing and a co-author of both this and the OECD report. said: "In recent years China has responded with investments in agriculture as they are needed to increase pro ductivity

The Agriculture Bank of China announced earlier this production and "prevent month it would increase loans to the sector by 24 per cent this year, the report

■ GOLD COMEX (100 Tray oz.; \$/tray oz.)

The US has banned imports of pork products from the Netherlands after an outbreak of swine fever in the south of the country, writes Gordon Cramb in Amsterdam. Dutch authorities this week began slanghtering upwards of 30,000 pigs on more than two dozen farms in North Brabant province.

The agriculture ministry in The Hagne says the US takes only some 4 per cent of the 144,000 tonnes of pigmeat exported by the Dutch, and no live animals are included. The US move to remove the Netherlands from its list of countries free of swine fever follows a similar action by Poland.

Dutch pig breeders stressed that the outbreak, in which a 12th case was identified yesterday, was limited to a small area around Odiliapeel which had already been sealed off to agricultural traffic. The use of farm vehicles was also banned there during this week's carnival celebrations The disease, which is said to carry no danger for humans, has recurred in spite of stricter Dutch rules for the transport of pigs. Prices of pigs for slaughter have firmed on Amsterdam commodity markets, with April delivery animals fetching above Fl 2,500 per kilogram.

## **BOT** wheat futures recover from lows

By Laurie Morse in Chicago

Wheat futures prices for March delivery hit life of contract lows for the second consecutive session at the Chicago Board of Trade yesterday, although light fund buying helped prices recover by early afternoon.

The March contract is just the markets were quiet tion to about 23m tonnes. ing March positions in duction, and the latest govcrop wheat will be available. grain supply and demand. Mr Victor Lespinasse, floor trader and grains analyst at
